

You said... We did...

You did not want to have to repeat your story to a different person on duty every day

We changed our duty system so you always see the same worker

You wanted more money available in your setting up home grant

We worked with you to review the finances available to care leavers and through this increased the setting up home grant from £1,500 to £2,000

You wanted information about entitlements in a range of formats

We worked with you to design a range of information about entitlements, including credit card size information, online videos and information on Facebook

We needed to prepare young people better for leaving care

We worked with you to develop an independence checklist.

We have developed a partnership with the Sorted project and ensure young people moving to social housing are referred to this

Pathway Plans were unfriendly documents that were not valued

We are piloting new independence sessions.

Young people's issues are not always prioritised

We worked with you to develop a new look Pathway Plan which we are now using

Care leavers achievements are not always recognised

We will audit issues you raise to improve practice

We hosted Coventry's first Care Leavers Conference and celebration event in October 2015
