# Coventry North – Options Modelling Outputs

October 2020

# **Section 1- Introduction**

## Introduction

- WSP commissioned to model 6 CNTP (Coventry North Transport Packages) in forecast year CASM 2041, in AM & PM Peaks.
- Corresponding Assumptions Log (issued 2020.08.28) contains details of modelling assumptions of each highway scheme composing each of the transport packages.

# CNTP Optioneering Results

The structure of CNTP Optioneering Results slides is as follows:

- Section 2 – Packages Definition
- Section 3 – Difference Flow Analysis
- Section 4 – Node Delay Analysis
- Section 5 – Journey Route Time Analysis
- Section 6 – Network Statistics
- Section 7 – Journey Time Skims Sector Analysis
- Section 8 – Select Link Analysis
  - M6 J3
  - New M6 Junction and Link Road

# Difference Flow Analysis Summary (AM/PM)

- P1 (Partial Link Rd) / P1\_A1 ( Opt 2)/ P1\_A2 (Opt 2A)
  - Does not make significant impact either with partial or full KLR
  - Local and Strategic Impacts
    - Reduction traffic on Holbrook Area
    - Local NW traffic using new junction and link road
    - Some strategic traffic from M42 to M6 divert using A45 to M6 via new link road to M6 Corley Jnc
    - Less congestion on M6 J3, allows more traffic to pass through the junction.
- P2A\_1
  - More local than strategic impacts compared to P1
  - Local
    - Reduction traffic on Holbrook Area
    - Local NW traffic using KLR to access M6 J3 to M6 EB and new M6 Junction to M6 WB
  - Strategic
    - Benefit to Solihull East M6 EB traffic divert from M42 using to A45 via new link road to the new M6 junction

# Difference Flow Analysis Summary (AM/PM)

- P3
  - Local traffic impacts
    - KLR and Rowley Left slips results reduction of traffic on Holbrook Area
    - Slips at M6 J3, improves congestion and allow more traffic to pass through the junction.
- P4\_A1
  - Local traffic impacts
    - KLR results reduction of traffic on Holbrook Area
    - M6 J3 (Hamburger Rd & Left Slips)
      - M6 J3Left Slips improves A444 to Rowleys Grn NB traffic in AM and SB direction in PM peak
      - Hamburger improves capacity but not as much compared to P3.
      - Could be improved if detailed signals and design layout taken into consideration
    - Rowley Green (Flyover)
      - Improve flow at the junction
- P5
  - Local traffic impacts
    - KLR results reduction of traffic on Holbrook Area
    - M6 J3 (Close B4113 Arm)
      - Improvements M6 J3 capacity
    - Rowley Green (Hamburger Roundabout)
      - Additional flows at junction (additional delays with new signals)

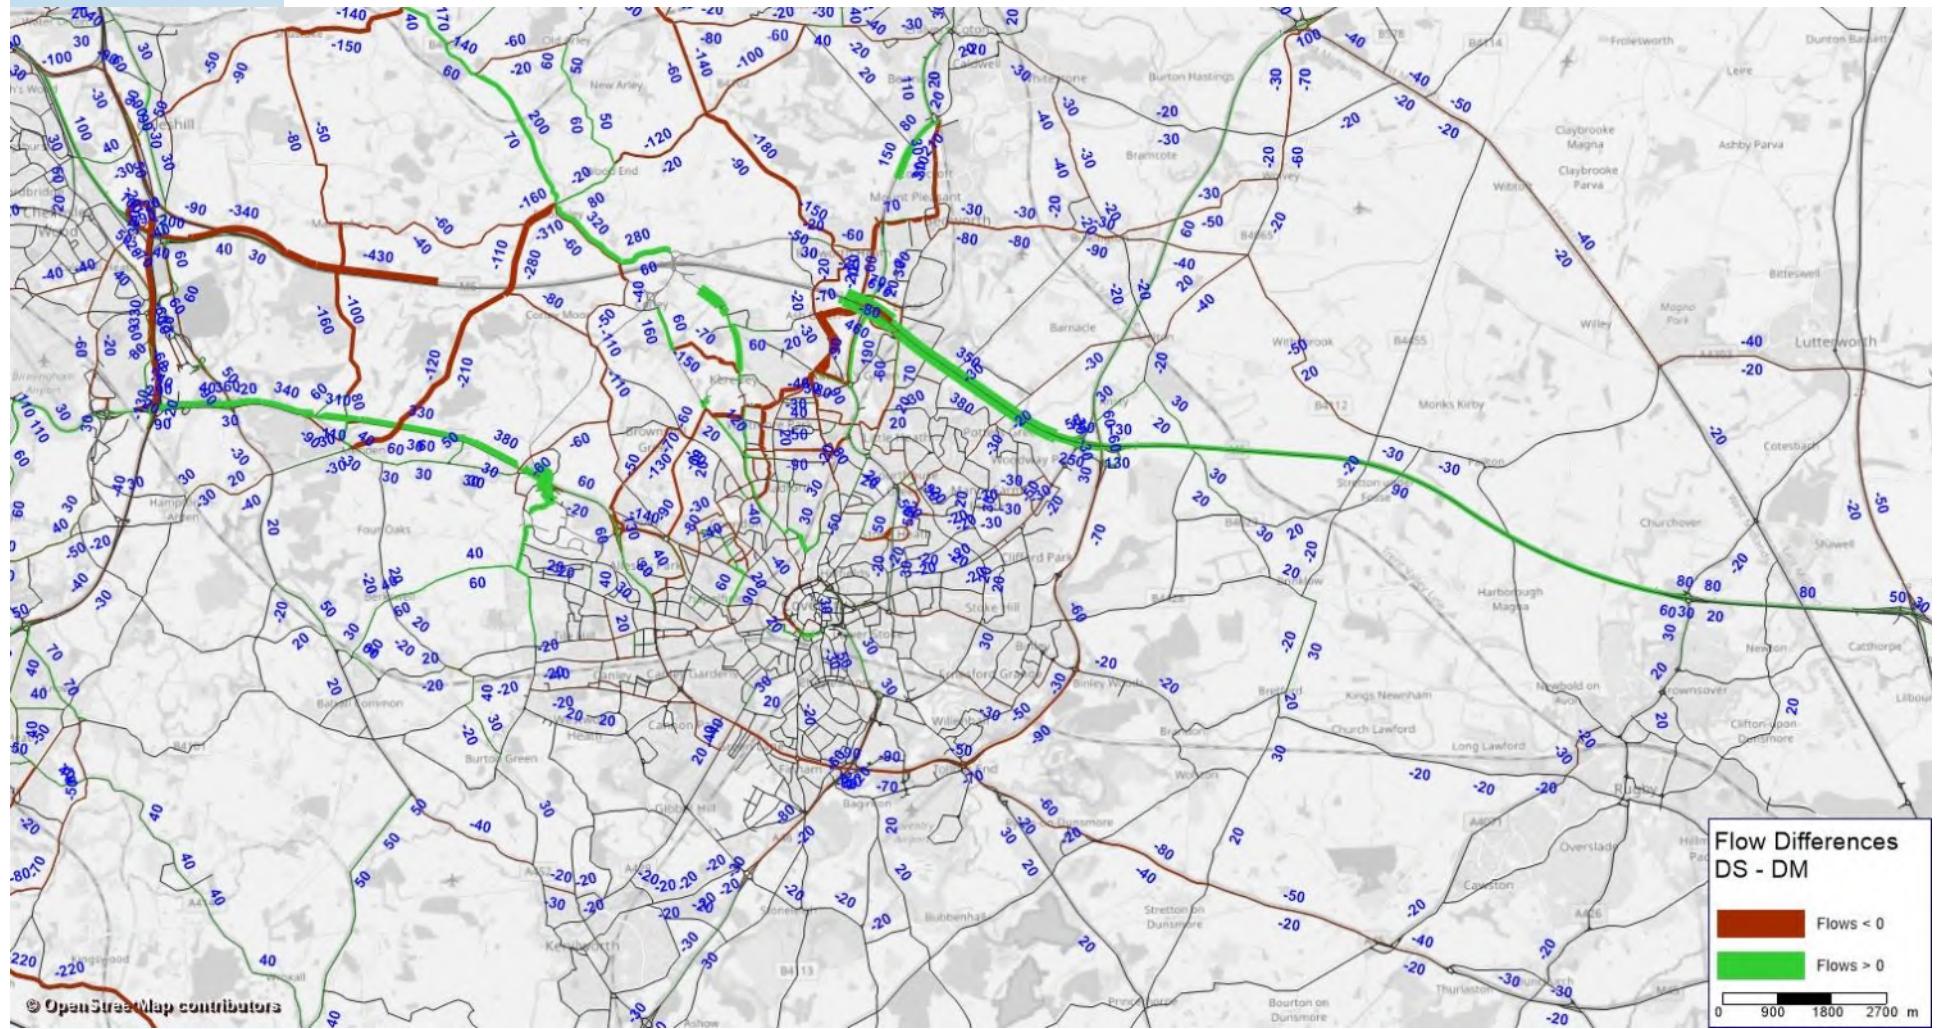

# Difference Flow Analysis Summary (AM/PM)

- P6
  - Local traffic impacts
    - KLR and Rowley Left slips results reduction of traffic on Holbrook Area
    - M6 J3 (A444 Tunnel)
      - Improves capacity at M6 J3
      - Less delay at signalised junction

# Node Delay Difference Analysis Summary (AM/PM)

- P1 (Partial Link Rd) / P1\_A1 ( Opt 2)/ P1\_A2 (Opt 2A)
  - Junction delay reduction at M6 J3
  - Reduction delay at Holbrook area
- P2\_A1
  - Reduction delay at Holbrook area
  - Minimal impact at M6 J3
  - Increased delay at Longford Rd / Blackhorse Road due to new bridge across Hawkes Level Crossing
- P3
  - Improve congestion at M6 J3
  - Reduction delay at Holbrook area
  - Increased delay at Longford Rd / Blackhorse Road due to new bridge across Hawkes Level Crossing
- P4\_A1
  - Improve congestion at M6 J3 but additional delays at new Hamburger Signalised Junction
  - Reduction delay at Holbrook area
  - Improve congestion at A444 Rowleys Green (Flyover)
  - Decreased delay at Longford Rd / Blackhorse Road due to new Link Road to Stephenson Rd

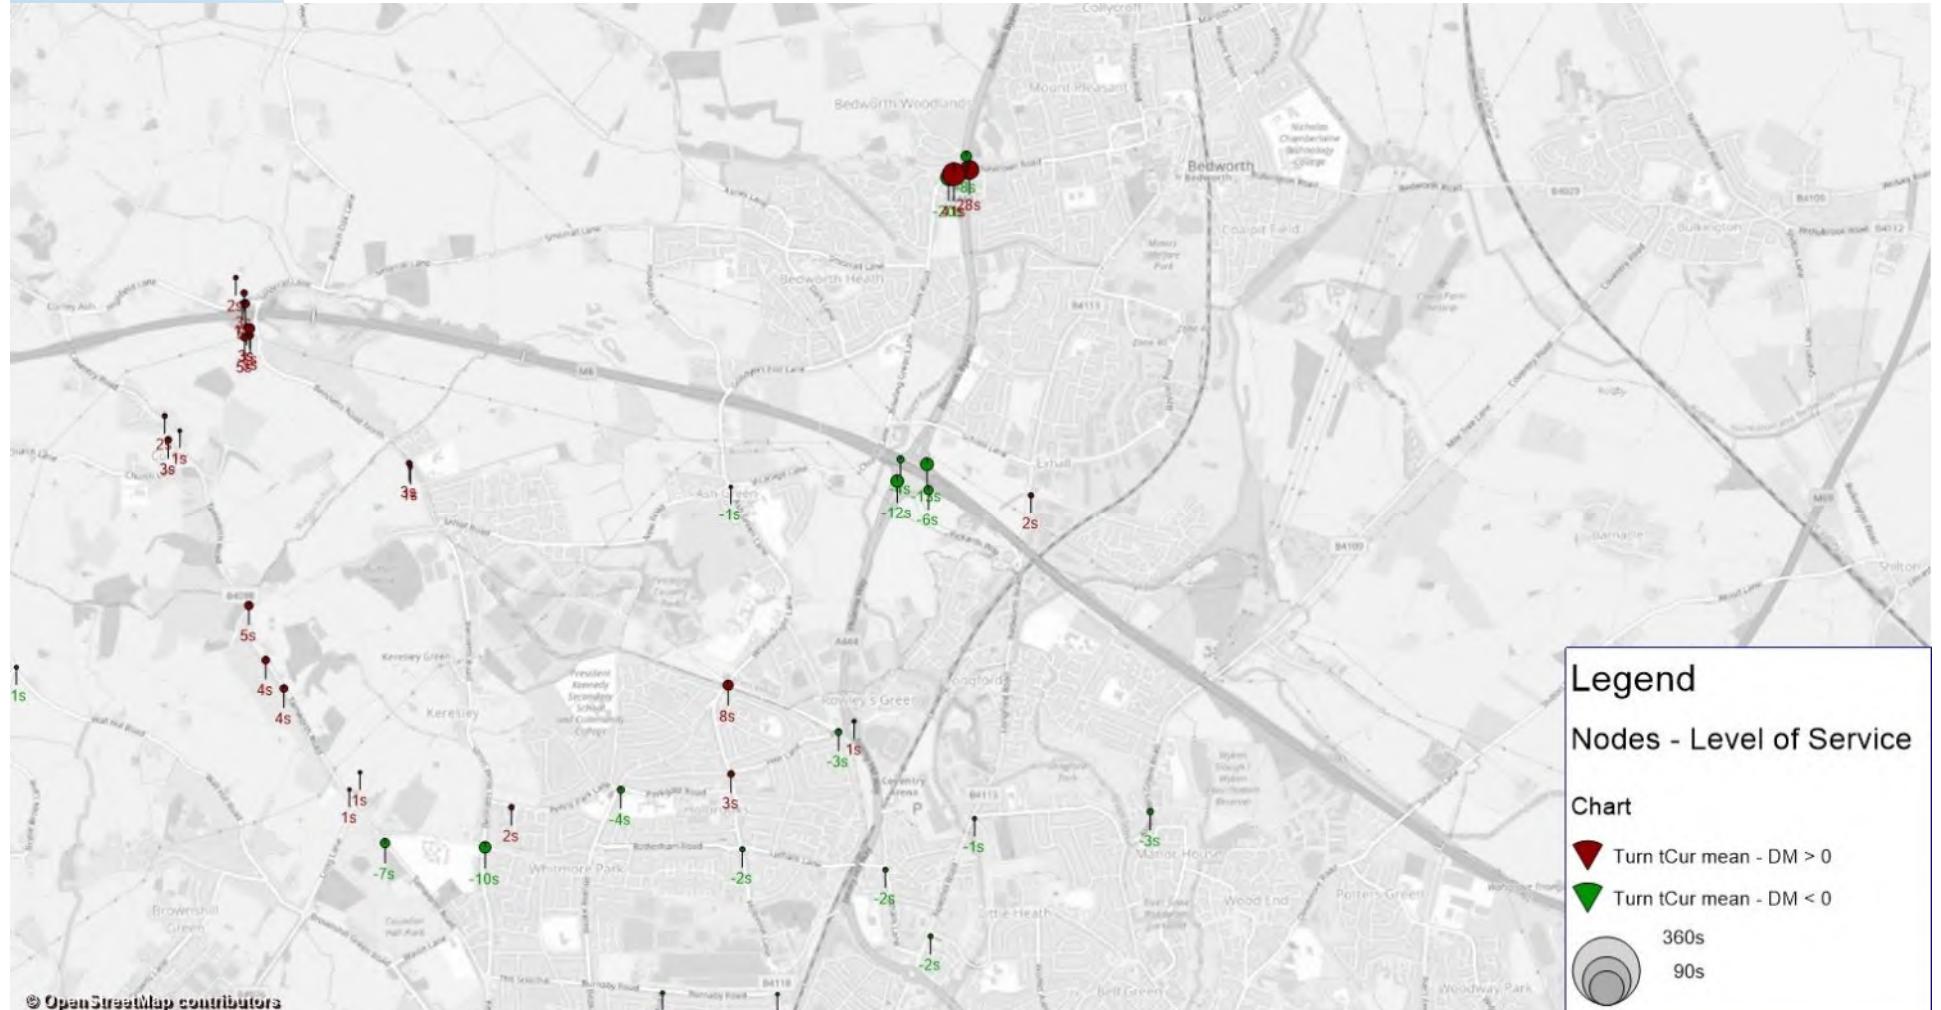

## Node Delay Difference Analysis Summary (AM/PM)

- P5
  - Reduction delay at Holbrook area
  - Slight improvement congestion at M6 J3
  - Decreased delay at Longford Rd / Blackhorse Road due to new Link Road to Stephenson Rd
  - Additional delay at A444 Rowleys Green Handburger Roundabout
- P6
  - Improve congestion at M6 J3 with the A444 tunnel.
  - Reduction delay at Holbrook area
  - Slight increase delay at A444 Rowley Green Roundabout due to additional traffic flow due to the new tunnel.

# Node Delay Difference Analysis Summary (AM/PM)

- P1 (Partial Link Rd) / P1.1 ( Opt 2)/ P1.2 (Opt 2A)
  - Journey improvements towards Bedworth & Nunetaon via M6 J3
  - Largest time savings 6 to 8 minutes (between Keresley and M6 W) for both AM and PM peaks
  - Improve journey times between Keresley & BIA ( reduction 1 to 2 minutes)
  - Some journey time improvements between Beake Ave & Wheelwright Lane
- P2
  - Minimal journey time improvements along the selected routes except between Keresley to M6 W.
  - Some journey time improvements between Beake Ave & Wheelwright Lane
- P3
  - Routes via M6 J3
    - AM peak: about 1 to 2 minutes journey time savings.
    - PM peak: 1 to 2.4 minutes journey time savings
  - No changes journey times routes to BIA and between strategic routes between M42 and M6 E.
  - Some journey time improvements between Beake Ave & Wheelwright Lane

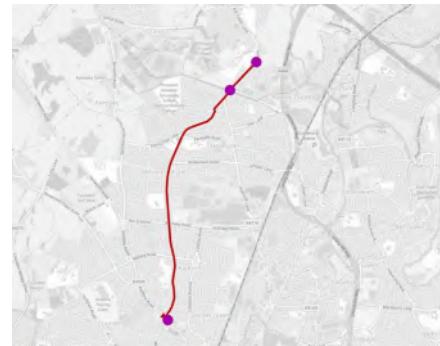

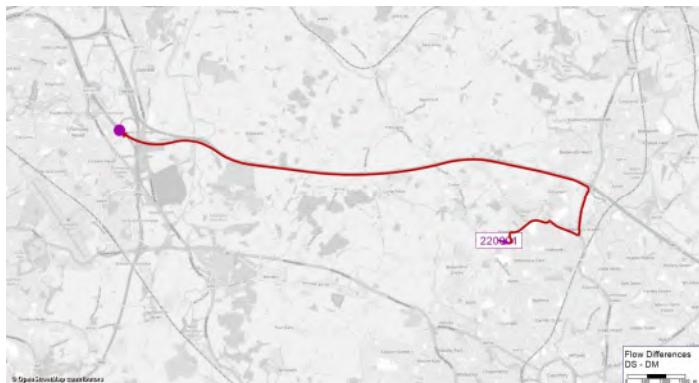

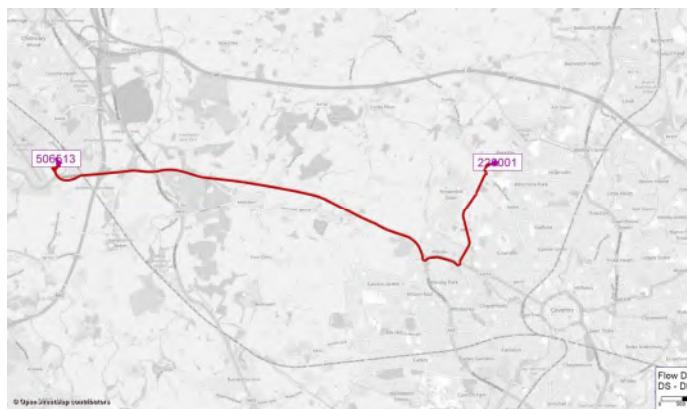

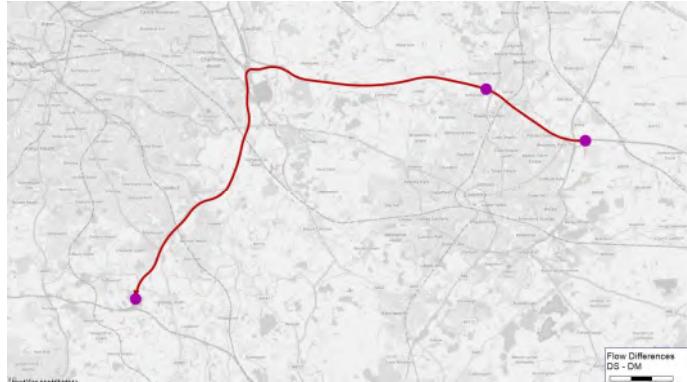

# Node Delay Difference Analysis Summary (AM/PM)

- P4\_A1
  - Similar as P4 but less journey time savings routes via M6 J3 due signalised junction at Hamburger Roundabout.
  - No changes journey times routes to BIA and between strategic routes between M42 and M6 E.
  - Some journey time improvements between Beake Ave & Wheelwright Lane
- P5
  - Minimal journey time savings routes via M6 J3 due additional congestion at A444 Hamburger Roundabout
  - No changes journey times routes to BIA and between strategic routes between M42 and M6 E.
  - Some journey time improvements between Beake Ave & Wheelwright Lane
- P6
  - Significant journey time savings routes towards A444 (Nuneaton & Bedworth) both directions due to the tunnel (1.5 to 4 minutes)
  - Time benefits other routes via M6 J3, due to more capacity at the junction.
  - No changes journey times routes to BIA and between strategic routes between M42 and M6 E.
  - Some journey time improvements between Beake Ave & Wheelwright Lane
