A list of abbreviations used in this report.

AMR	Authority Monitoring Report
CCAAP	City Centre Area Action Plan
DtC	Duty to Cooperate
HDT	Housing Delivery Test
HFR	Housing Flows Return
HEDNA 2022	Coventry & Warwickshire Housing & Economic Development Needs Assessment (2022)
HELAA 2023	Housing and Economic Land Availability Assessment (2023)
HMA	Housing Market Area
HMO	Home in Multiple Occupation
LDS	Local Development Scheme
NPPF	Nation Planning Policy Framework
PBSA	Purpose Built Student Accommodation
SHLAA	Strategic Housing Land Availability Assessment
SHMA 2015	Coventry & Warwickshire Joint Strategic Housing Market Assessment (2015)
SPD	Supplementary Planning Document
SUE	Sustainable Urban Extension

Introduction

- 1.1 This Authority Monitoring Report ('AMR') provides an overview of housing and employment development in the city of Coventry during the monitoring period 1st April 2022 to 31st March 2023 ('2022/23').
- 1.2 Section 113 of the Localism Act 2011 requires every Local Planning Authority ('LPA') to publish an AMR at least once a year. Although each LPA has discretion as to which targets and indicators to include in their AMR, they must remain consistent with relevant legislation and conform to Regulation 34 of the Town and Country Planning (Local Development) (England) Regulations 2012, which sets out minimum requirements for the contents of the report. In short, this includes reporting on the implementation of the authority's Local Development Scheme ('LDS'), performance against housing delivery targets as set out in its development plan (i.e. a local plan), Community Infrastructure Levy and Duty to Cooperate ('DtC').
- 1.3 The primary purpose of this document is to share the performance of the planning service in delivering and supplying housing and employment sites. It provides an update representing the most significant changes experienced within Coventry during the year.
- 1.4 Whilst there is no requirement for AMRs to be submitted to the Secretary of State, it remains the statutory duty of the LPA to monitor its own performance against the requirements adopted through the Coventry Local Plan 2011-2031 ('Local Plan').
- 1.5 Every policy of the adopted Local Plan was reviewed as part of the Local Plan Review Regulation 18 (Issues and Options Consultation) during the summer of 2023.¹
- 1.6 The words 'housing', 'homes' and 'dwellings' in this report may at times be used to mean any type of residential dwellinghouse as defined under Use Class C3 of the Town and Country Planning (Use Classes) Order 1987. Where a clear distinction is required—for example, reporting on specific types of buildings, such as a detached house or a flat—this will be explicitly stated.
- 1.7 Unless otherwise stated, all references are to developments within Coventry City Council's administrative area.

Local Plan and supplementary planning documents

Local Plan

- 2.1 The Coventry City Council Local Plan was adopted in December 2017 and covers the period 1st April 2011 to 31st March 2031. The supporting text to Policy IM1 of the Local Plan explains how the Council will monitor progress annually towards the achievement of key targets for housing and employment.
- 2.2 However, as the plan became more than five years old in December 2023, the Council is required to review all adopted policies to decide if they are up to date or whether any amendments may help to reflect changes to national policy or other matters.
- 2.3 Coventry City Centre is also subject to an Area Action Plan ('CCAAP'). This was produced and adopted in December 2017 as part of the Local Plan process.
- 2.4 Coventry has one neighbourhood plan in effect: Willenhall Neighbourhood Plan. Neighbourhood plans are designed by local communities to guide development in their parish or other designated area. They can identify additional development sites (over and above those identified in the Local Plan) and help to guide aspects of development. Once 'made', a Neighbourhood Plan forms part of the policy framework and is a material consideration in determining planning applications. Two more Neighbourhood Areas have been designated but no plans have since progressed:
 - Allesley (Neighbourhood Area designated 4th May 2016)
 - Finham (Neighbourhood Area designated 16th March 2017)

Supplementary Planning Documents

- 2.5 A Supplementary Planning Document ('SPD') can expand upon policies contained within a Local Plan to provide more detailed advice and guidance. SPDs cannot introduce new policies. One new SPD was adopted in 2022/23:
 - Biodiversity Net Gain (adopted December 2022)

Work on the Householder Design Guide SPD was ongoing at the end of the 2022/23 monitoring period and was adopted on 11th April 2023.

All SPDs can be found on the Council's website at the following link:
<https://www.coventry.gov.uk/planning-policy/coventry-local-plan-2011-2031/2>

Local Development Scheme

2.6 The current Local Development Scheme ('LDS') was published in November 2022. It sets out a timetable for producing policy documents, with the key targets listed below.

Local Development Scheme November 2022 key targets			
Target	Target date(s)	Status	Comments
AMR	Nov 2023	Complete	
Local Plan* Review Regulation 18 Consultation	Apr-Sep 2023	Complete	Regulation 18 Consultation completed 29 September 2023 and representations currently being considered.
Local Plan Review Regulation 19 Consultation	Jan-Jun 2024	Ongoing	Representations currently being assessed in preparation for the next stage Regulation 19.
Local Plan Review Submission	Jul-Sep 2024	Ongoing	Dependent on preceding stages.
Local Plan Review Examination	Oct-Mar 2025	Ongoing	Dependent on preceding stages.
Local Plan Adoption	Apr-Jun 2025	Ongoing	Dependent on preceding stages.
Homes in Multiple Occupation DPD	Jul 2022-Sep 2023	Ongoing	Submitted for examination August 2023.
Homes in Multiple Occupation Article 4 Direction	Jul 2022-Sep 2023	Complete	Brought into effect 30 th September 2023.
Tall Buildings Design Guide and View Management Framework SPD	Jul-Mar 2023	Complete	Adopted 13 th December 2022
Design Guidance for New Residential Development SPD	Jul-Dec 2022	Complete	Adopted 13 th December 2022
Biodiversity Net Gain SPD	Jul-Dec 2022	Complete	Adopted 13 th December 2022
Householder Design Guide SPD	Oct-Mar 2023	Complete	Adopted in April 2023.
University of Warwick SPD	TBC	Ongoing	Joint SPD with Warwick District Council, timetable not yet confirmed.

*All references to the Local Plan include the City Centre Area Action Plan

Housing

Local Plan Key Indicators

- H1 Provisions will be made for a minimum of 24,600 additional dwellings between 2011 and 2031:
- 2011-2016 (first 5 years): 1,020 homes per annum
 - 2017-2031 (following 15 years): 1,300 homes per annum
- H1 Housing land will be released in order to maintain a continuous 5-year supply of housing land in order to support a varied and flexible land supply to support housing delivery and sustainable development. This will be monitored through the Council's Annual Monitoring Report.
- H1 50% Completions on brownfield land
- H6 25% affordable homes provided on applicable sites

- 3.1. The Local Plan determined an *Objectively Assessed Need* for an additional 42,400 homes to meet the needs of predicted population growth over the plan period.
- 3.2. With land availability and other practical constraints considered, the Local Plan established a requirement for a minimum of 24,600 additional dwellings to be delivered in Coventry City Council's administrative area, with the deficit to be met by neighbouring authorities through *Duty to Cooperate* ('DtC') agreements. A joint *Memorandum of Understanding* between authorities in the Coventry & Warwickshire Housing Market Area ('HMA'), approved by Coventry City Council 12 January 2016, committed the following distribution of Coventry's housing need:
- Rugby Borough Council = 2,800
 - Nuneaton and Bedworth Borough Council = 5,480
 - Warwick District Council = 6,640
 - Stratford on Avon District Council = 2,020
 - North Warwickshire Borough Council = 860
- 3.3. In December 2023, the Local Plan became more than five years old. Consequently, the Council is required to review all adopted policies to decide if they are up to date, or whether any amendments may help to reflect changes to national policy or other matters.
- 3.4. Until the Local Plan Review is complete and has been approved by an Inspector appointed by the Secretary of State, the housing requirement established at the time of the Local Plan's adoption in December 2017 is considered out of date. Instead, the

minimum annual housing need must be calculated using the *standard method* calculation². This is explained in further detail in the **Housing Delivery Test** section of this report.

Housing delivery

3.5. The monitoring year 2022/23 saw a total of **1,674** additional dwellings delivered in Coventry. Communal accommodation is reported as an equivalent number of dwellinghouses based on the number of additional bedrooms. This is calculated in line with the Housing Delivery Test.³

3.6. The large majority (85.4%) of additional dwellings were new builds (**Figure 1**). Changes of use (a change of Use Class – for example, the alteration of an office to create a residential dwelling) accounted for 13.9% and a small number were from conversions of existing residential properties, such as the sub-division of a single house into multiple individual flats.

3.7. Cumulative delivery of 17,689 to 2022/23 was 24.6% above the Local Plan requirement of 14,200 at this stage in the projection (**Figure 2**). With the recent Local Plan

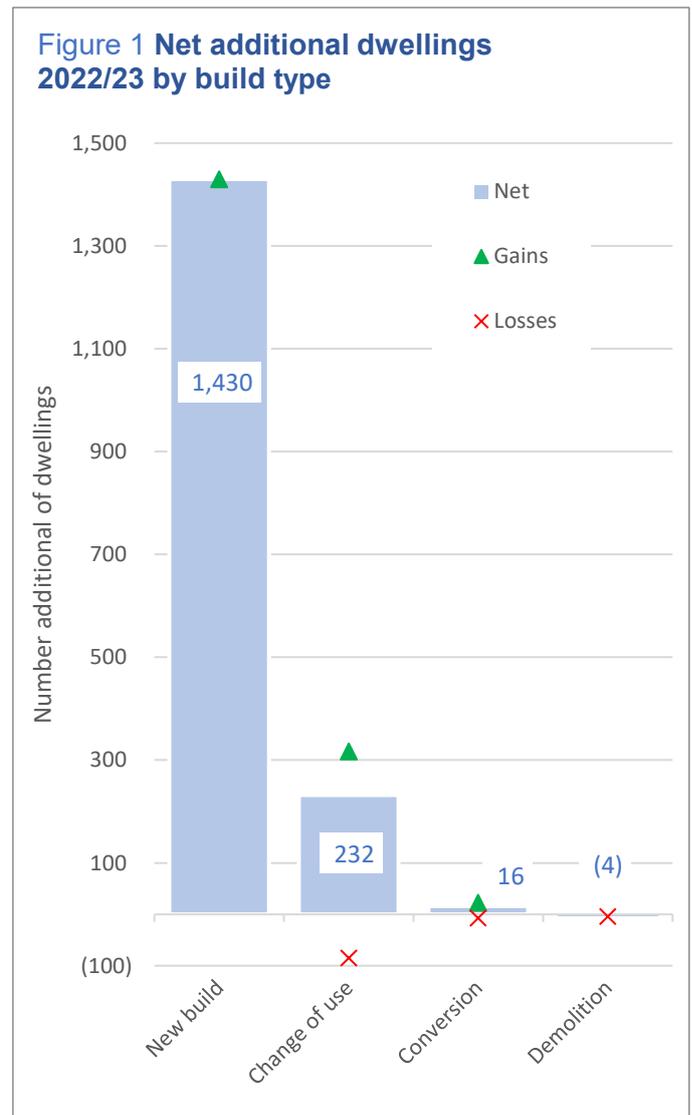

Figure 1 'New build' includes a small number extensions where additional dwellings were created.

² Housing and economic needs assessment. <https://www.gov.uk/guidance/housing-and-economic-development-needs-assessments#housing-need> (Accessed 09 October 2023).

³ Housing Delivery Test measurement Rulebook. <https://www.gov.uk/government/publications/housing-delivery-test-measurement-rule-book/housing-delivery-test-measurement-rule-book> (Accessed 09 October 2023).

Review rendering the established housing requirement out of date, **Figure 2** also includes a cumulative requirement at 2022/23 using the *standard method calculation*⁴.

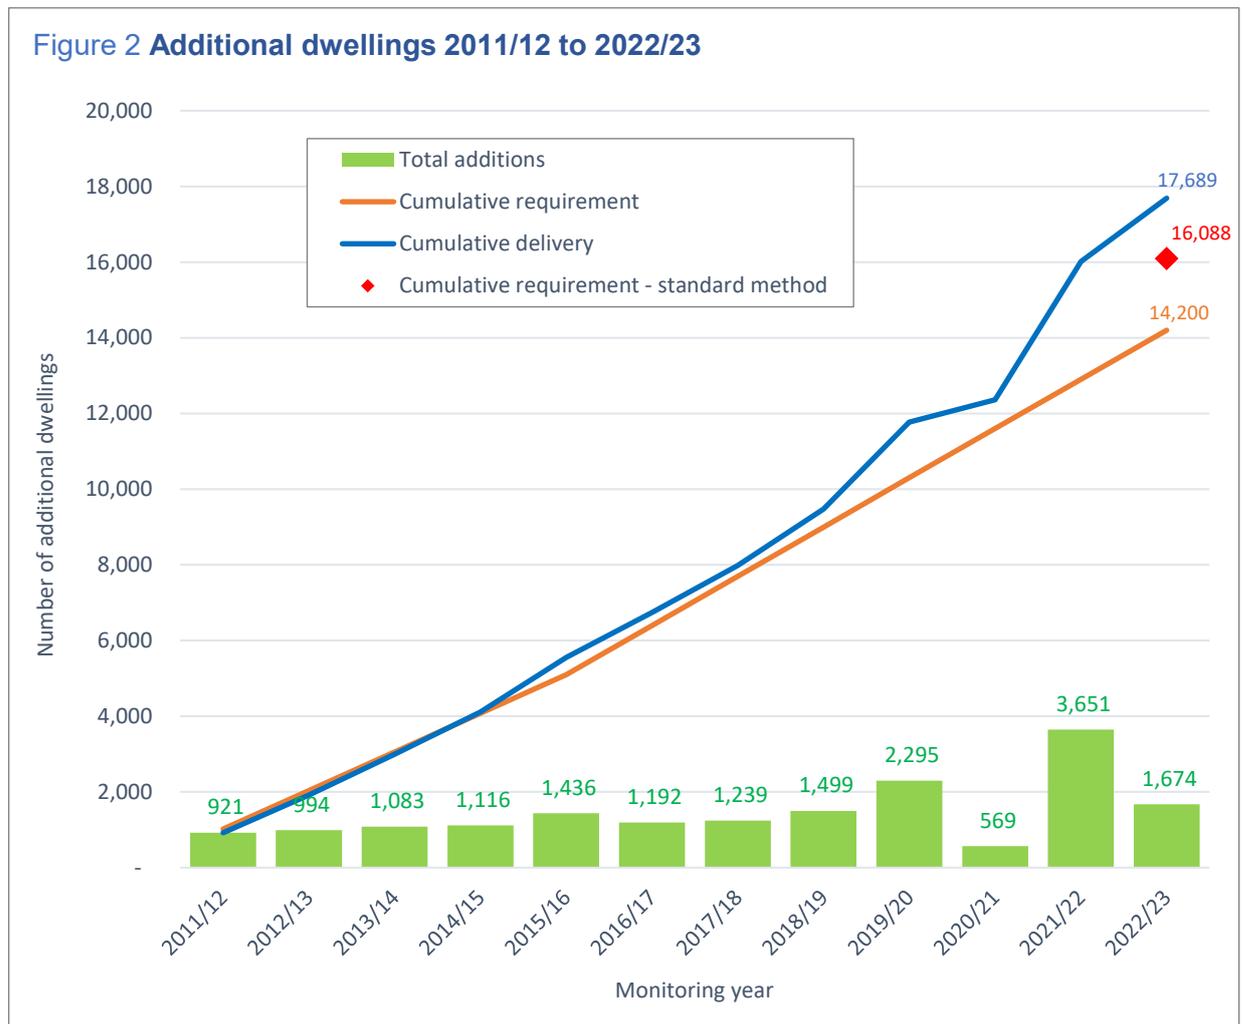

Figure 2 The trajectory of net additional housing across the Local Plan period to date. The ‘cumulative requirement – standard method’ figure of 16,088 at 2022/23 is the cumulative requirement if the Local Plan annual requirement were to be replaced by the *minimum annual housing need* (calculated using the *standard method*) since December 2022. See **Housing Delivery Test** section for more information.

CORRECTION: the number of completions in 2021/22 has been adjusted from the previously published AMR figure of 3,818 to 3,651 in response to a double counting error of 167 dwellings that were counted in both 2020/21 and 2021/22 (planning app. FUL/2018/1300).

Tenure

- 3.8. Four broad classifications of tenure are used in this report: Residential (Use Class C3), Purpose Built Student Accommodation (‘PBSA’ - Use Class Sui Generis), Homes in Multiple Occupation (‘HMO’ - Use Class C4 or Sui Generis⁵) and Care (Use Class C2).

⁴ See the Housing Delivery Test section of this report

⁵ HMO dwellings may be classed as either Use Class C4 or Sui Generis (‘SG’) depending on the number of occupants – C4 allows occupation of between three and six unrelated individuals, while SG allows seven or more.

'Care' covers a range of housing that provide an element of additional support, such as residential care homes, supported living or warden-controlled retirement housing. Both PBSA and Care accommodation may be in the form of communal living or self-contained, and each is recorded in the housing stock according to the requirements of the Housing Delivery Test.

- 3.9. The continued growth of PBSA reflects Coventry's reputation as a leading university city, attracting students from around the world.

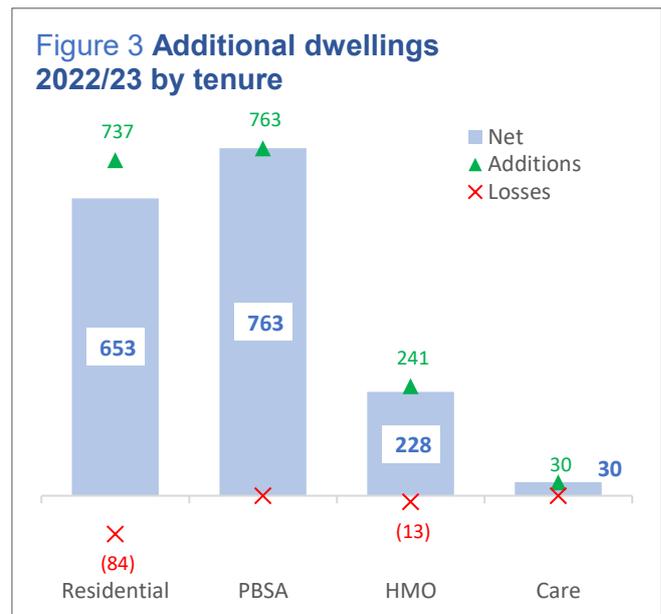

Figure 3 Communal accommodation figures are 'dwelling equivalents' calculated using the Housing Delivery Test measurement Rule Book.

Communal accommodation (HMO and PBSA)

- 3.10. Communal accommodation provides one or more elements of shared living for at least three people from two or more different 'households'. This is commonly in the form of residents with private bedrooms sharing a kitchen or bathroom.
- 3.11. The *Housing Delivery Test* ('HDT') is an annual measurement of housing delivery over the previous 3-year period that is submitted to the Government annually. In this calculation, additional communal bedrooms are converted to a 'dwelling equivalent' figure, and it is this figure that is used to report overall housing delivery performance (further information can be found in the **Housing Delivery Test** section).
- 3.12. A second annual return called the *Housing Flows Reconciliation* ('HFR') sets out to establish the housing stock based on Council Tax valuations. In this return, each communal accommodation is usually counted as one single dwelling because it has a single Council Tax valuation (although large PBSA sites may attract multiple Council Tax valuations depending on their layouts).
- 3.13. Of the total 1,674 additional dwellings delivered in 2022/23, 228 were 'dwelling equivalents' derived from a change of use from dwellinghouses to HMOs. This resulted in a net loss of 64 individual dwellinghouses (**Table 1**). The total increase in HMO

3.14. bedrooms was 417, but not enough data is available on the loss of the number of bedrooms in dwellinghouses.

3.15. Following concerns of potential over-densification of HMO properties in some areas of the city, the Council began a process of consultation in September 2022 seeking to limit the number of new HMOs.

3.16. As of 30th September 2023, an Article 4 Direction⁶ now requires planning permission to be obtained before a dwellinghouse (Use Class C3) can be changed to a small HMO (C4) in 11 wards⁷ of Coventry. The previously existing requirement to obtain planning permission to change a dwellinghouse (or any other building) to a large HMO (Use Class Sui Generis) remains unchanged.⁸

3.17. The Council is producing bespoke policy for HMOs, through a Homes in Multiple Occupation Development Plan Document. This was submitted to the Secretary of State on 25th August 2025 for Examination in Public. It contains draft policies on overall principles, concentrations and thresholds, sandwiching (potential HMOs on either side of a residential dwelling) and amenity and design. Up to date information can be found online at <https://www.coventry.gov.uk/planning-policy/homes-multiple-occupation-development-plan-document> and the AMR for the 2023/24 monitoring year will include further information on monitoring these policies.

3.18. Four sites delivered 870 additional student bedrooms in 2022/23. Most were in the form of self-contained flats, although one development provided a mixture that included some communal accommodation (**Table 2**).

Table 1 Dwellinghouses to Homes in Multiple Occupation 2022/23

Type	Gains	Losses	Net
Dwelling house	9	-73	-64
HMO	73	-3	70
<i>Small HMO (C4)</i>	44	-2	42
<i>Large HMO (SG)</i>	30	-1	29

Figures show the number of individual properties rather than 'dwelling equivalents'. An additional 70 HMO properties provided 429 bedrooms, which equated to 238 dwellings in the overall delivery figures (before losses).

The net outcome does not produce a zero balance because three HMOs were changed to multiple dwellings: FUL/2021/0528 (4 flats), FUL/2019/0866 (2 houses) and FUL/2022/0166 (3 flats).

Data available in **Appendix 2**.

⁶ Article 4 Direction. Available at https://www.coventry.gov.uk/downloads/download/225/article_4_directions (Accessed 09 October 2023)

⁷ The 11 wards subject to HMO Article 4 Direction: Cheylesmore, Earlsdon, Foleshill, Lower Stoke, Radford, Sherbourne, St Michaels, Upper Stoke, Wainbody, Westwood and Whoberley

⁸ HMOs and planning permission. HMO Licensing. Coventry City Council. Available at: <https://www.coventry.gov.uk/licensing-regulation/hmo-licensing/4> (Accessed 09 October 2023).

Table 2 Number of Student bedrooms delivered 2022/23

Planning app.	Site	Equivalent dwellings	Additional bedrooms		
			Self contained	Communal	Total
FUL/2018/2651	land off De Montfort Way	673	602	178	780
REN/2013/0804	5-7 Lower Holyhead Road	44	44	0	44
FM/2018/3419	16a Queens Road	32	32	0	32
FUL/2021/2348	Land adj 57 Berry Street	14	14	0	14
		763	692	178	870

Equivalent dwellings are calculated using the Housing Delivery Test ratio of 2.5 PBSA communal bedrooms = 1 dwelling.

Residential housing mix

3.19. Of the 653 additional residential dwellings (Use Class C3) delivered in 2022/23, the most numerous were semi-detached houses (37%), followed by flats and detached houses at around 27% each. Although mid-terrace properties were delivered in 2022/23, there was no net gain due to an equal number of losses (46) of existing housing stock to HMOs (**Figure 4**).

3.20. **Figure 5** shows a fairly broad spread of dwelling types delivered, with 3-bed the most common. This is a change from 2021/22, which saw a higher proportion of 1-bed and 2-bed properties, and it is largely a result of allocated sites increasing delivery of a range of family homes.

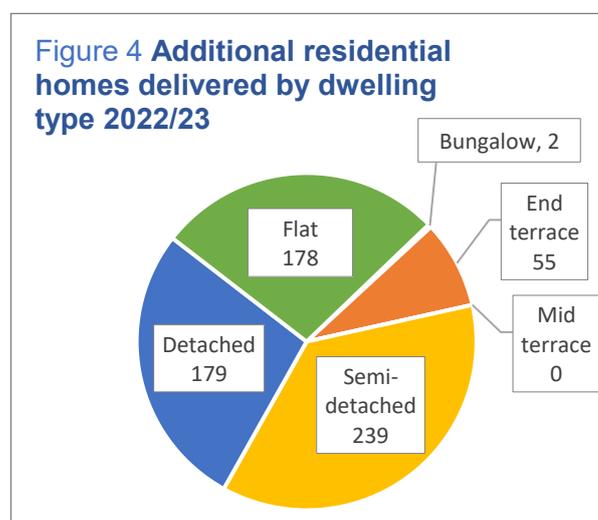

Figure 4 Includes net additions of dwellinghouses with Use Class C3 – excludes PBSA, HMO & large care accommodation.

Figure 5 Additional dwellings (C2 and C3) 2022/23 by property type and number of bedrooms

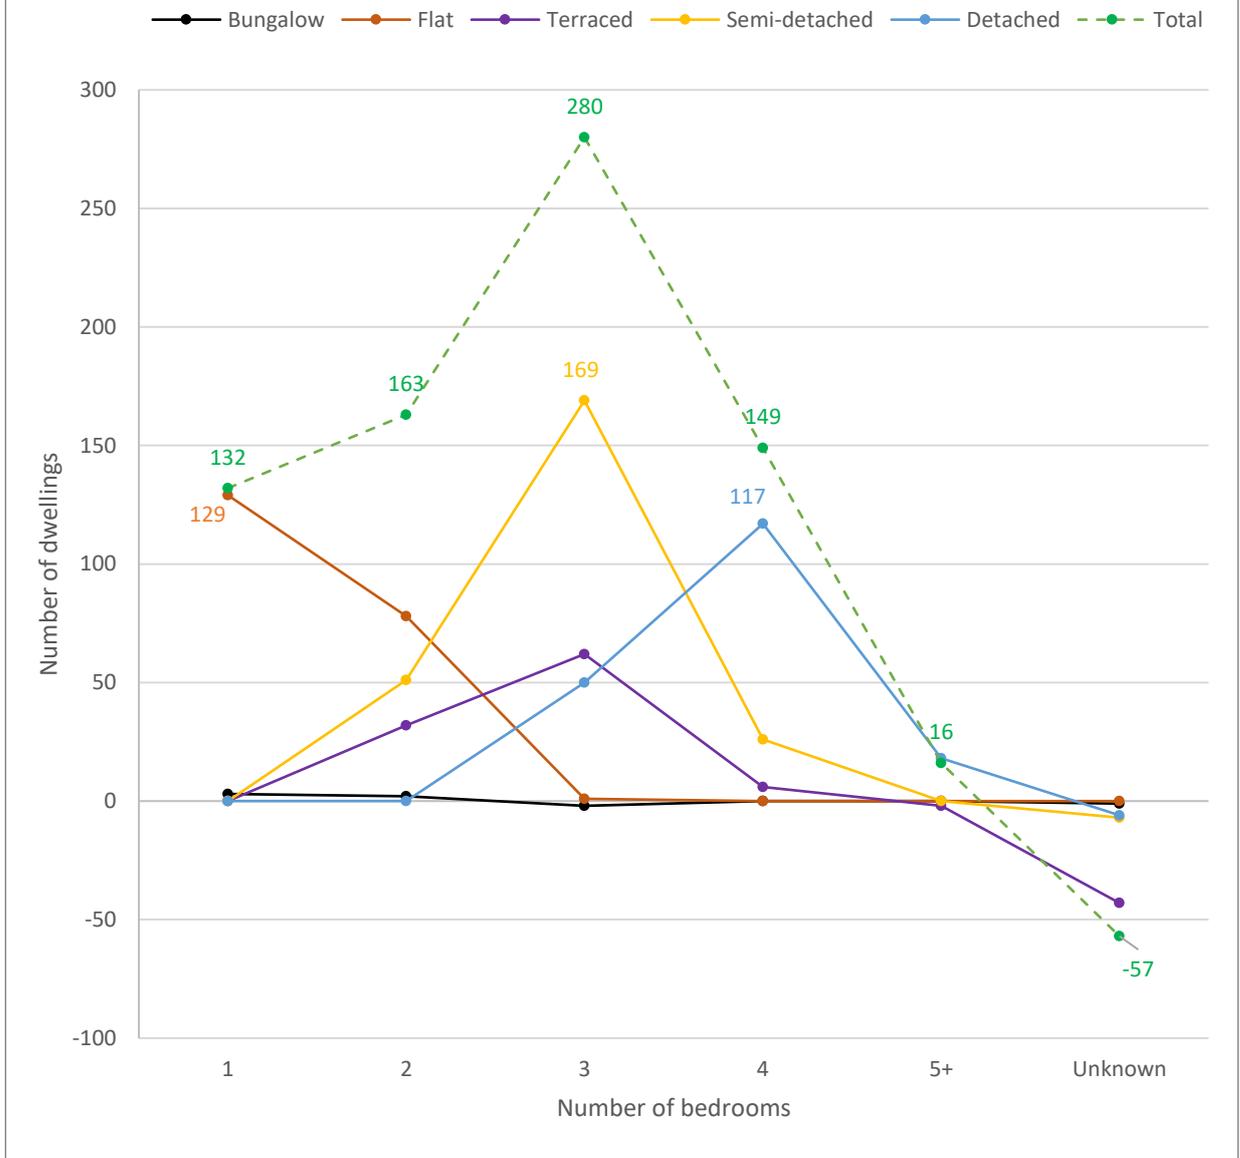

Figure 5 Includes Large Care (Use Class C2) but excludes PBSA and HMO accommodation and totals 683 dwellings. A loss of 57 dwellings with unknown numbers of bedrooms were mostly due to changes of use from dwellinghouses to HMOs, where information was lacking detail or not available.

Data available in **Appendix 3**.

- 3.21. Policy H4 of the Local Plan requires ‘a mix of market housing which contributes towards a balance of house types and sizes across the city in accordance with the latest Strategic Housing Market Assessment.’
- 3.22. The market housing mix (by number of bedrooms) delivered in 2021/22 and 2022/23 is shown in **Table 3**. At the time of publication, data were not available for previous years.

Table 3 Market housing mix by number of bedrooms delivered in 2021/22 and 2022/23

	1 bed	2 bed	3 bed	4+ bed	Total	Unknown
2022/23	77	103	215	159	554	-57
2021/22	289	279	190	117	875	-1
Total	366	382	405	276	1429	-58

Figures include only market housing Use Class C3 (they exclude affordable housing and C2, C4 and SG Use Classes).
The 2021/22 figure is adjusted from the previously published data, with a reduction of 167 dwellings to correct double counting of planning app. FUL/2018/1300 in years 2020/21 and 2021/22.
Data available in **Appendix 3**.

3.23. The Coventry and Warwickshire Joint Strategic Housing Market Assessment ('SHMA 2015')⁹ provided guidance on market housing mix (by bedrooms) for the Plan period 2011-2031. This guidance was updated in 2022 through the Housing and Economic Development Needs Assessment ('HEDNA 2022')¹⁰.

Table 4 Suggested market housing mix by bedroom for Coventry 2011-2031

	SHMA 2015	HEDNA 2022	Delivery 21/22-22/23
1-bed	5-10%	10%	25.6%
2-bed	25-30%	40%	26.7%
3-bed	40-45%	40%	28.3%
4+ bed	20-25%	10%	19.3%

Delivery percentage figures are based on *Table 3*. Unknown losses (mostly comprising changes from dwellinghouses to HMOs) are not included.

3.24. **Table 4** shows the delivery of properties in 2021/22 to 2022/23 as a percentage of the total market housing delivery over these years. It should be noted that these figures do not represent the current overall market housing mix in Coventry.

Site allocations

3.25. With PBSA excluded (given its own category), most additional dwellings (491) were on allocated sites – identified in the Local Plan for development or recognised as major sites with extant planning permissions granted prior to the final adoption of the Local Plan (**Figure 6**).

⁹ Coventry & Warwickshire Joint Strategic Housing Market Assessment 2015. Available at: <https://www.coventry.gov.uk/downloads/file/20533/cov-warwickshire-joint-shma-executive-summary> (Accessed 27 October 2023).

¹⁰ Coventry & Warwickshire Housing & Economic Development Needs Assessment 2022. Available at: <https://www.coventry.gov.uk/downloads/file/39499/coventry-and-warwickshire-housing-and-economic-development-needs-assessment-hedna-> (Accessed 27 October 2023).

3.26. Sites identified in the 2016 Strategic Housing Land Availability Assessment ('SHLAA') accounted for a further 27 completions, which is lower than the previous year's forecast of 244 due to a combination of sites not coming forward as anticipated and the previous method used to forecast delivery at SHLAA sites across the Plan period. The SHLAA was replaced by the Housing and Economic Land Availability Assessment ('HELAA') in July 2023.¹¹

3.27. PBSA delivery in 2022/23 was lower than previously forecasted due to slower than anticipated completions at some large sites, particularly at Warwick Road (planning app. FUL/2020/0217) and Albany Road (FUL/2021/0953). An equivalent of 1,092 dwellings were under construction at PBSA sites at the end of 2022/23, with a further 2,327 permitted (outline and detailed consent) but not commenced.

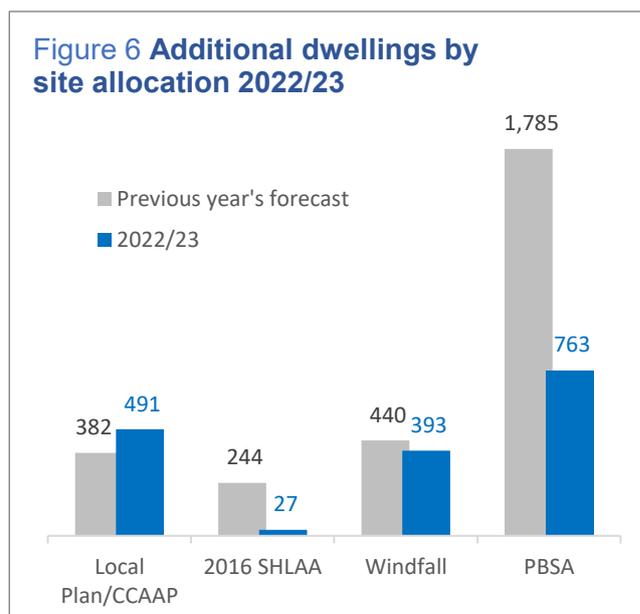

Figure 6 PBSA is excluded from allocated sites and given its own category.

Local Plan/CCAAP includes historic major sites granted planning permission during the creation of the Local Plan.

Data available in **Appendix 1**.

Density

3.28. Policy H9 of the Local Plan sets out the following minimum number of dwellings per hectare that should be achieved:

- Previously Developed Land inside the Ring Road: 200
- Previously Developed Land outside the Ring Road: 35
- Greenfield: 30

3.29. Of the major residential developments (10 or more dwellings) with completions in 2022/23, average density was broadly in line with Policy H6. The clear outlier was a site inside the ring road (8 Ironmonger Row, planning application FUL/2020/1807) that

¹¹ Housing and Economic Land Availability Assessment 2023. Planning Policy. Available at: <https://www.coventry.gov.uk/downloads/download/7618/housing-and-economic-land-availability-assessment-2023> (Accessed 02 November 2023).

was changed from office space to residential flats, with a density of 382 dwellings per hectare (**Figure 7**).

3.30. Fifteen major planning applications approved in 2022/23 (both outline and detailed consent) had no completions during the year but were permitted a total of 1,810 dwellings on 56.46 hectares of land. At 26 dwellings per hectare, greenfield sites were a little under the target of 30, but sites on previously developed land outside the Ring Road comfortably surpassed the target at 51 dwellings per hectare.

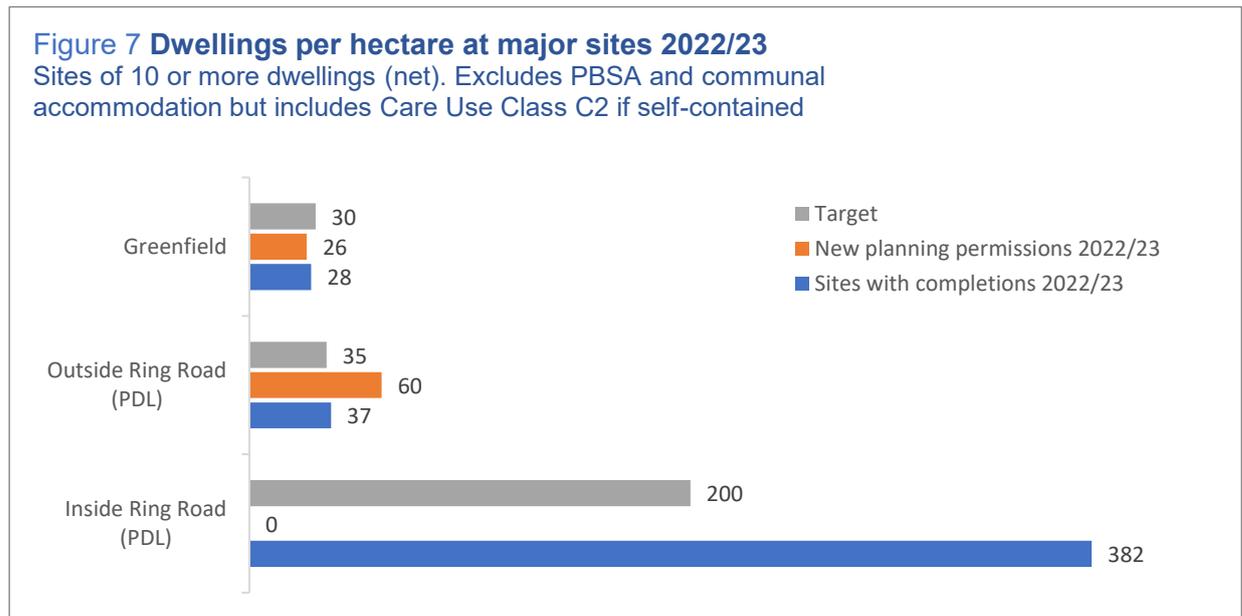

Figure 7 Average density of dwellings per hectare calculated using the aggregated number of dwellings permitted and the aggregated land area. 'Completions 2022/23' includes planning permissions from any year with completions in 2022/23; 'Permissions 2022/23' shows only new planning permissions granted in 2022/23 with no completions.

Figures include both detailed and outline planning permissions. Data available in **Appendix 4**.

Previous land use

3.31. The NPPF Glossary¹² defines previously developed land as:

'Land which is or was occupied by a permanent structure, including the curtilage of the developed land (although it should not be assumed that the whole of the curtilage should be developed) and any associated fixed surface infrastructure. This excludes: land that is or was last occupied by agricultural or forestry buildings; land that has been developed for minerals extraction or waste disposal by landfill, where provision for restoration has been made through development management procedures; land in built-up areas such as residential

¹² National Planning Policy Framework. Available at: <https://www.gov.uk/government/publications/national-planning-policy-framework--2> (Accessed 20 October 2023).

gardens, parks, recreation grounds and allotments; and land that was previously developed but where the remains of the permanent structure or fixed surface structure have blended into the landscape.'

3.32. The majority of completions (78.7%) in 2022/23 were on previously developed land (brownfield sites), with the rest on greenfield sites. No developments were recorded on green belt land (**Figure 8**).

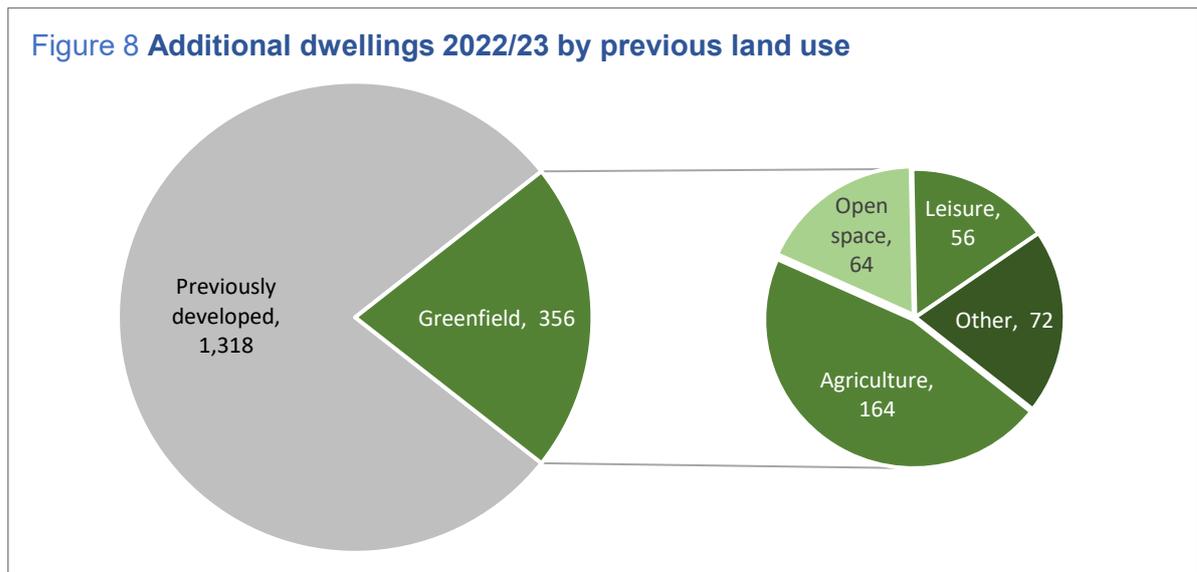

Figure 8 Includes all development types that count towards housing delivery: residential (C3), PBSA (Sui Generis), HMO (C4 or Sui Generis), Large Care (C2).

Data available in **Appendix 1**.

3.33. Of the 356 dwellings built on greenfield sites, most were on former agricultural land removed from the green belt during the adoption of the Local Plan (134 of these dwellings form part of the Keresley SUE, planning application RMM/2019/1030). The following five categories of greenfield sites are used here:

- Agriculture: land for commercial farming, grazing, forestry and general grasslands
- Garden: residential gardens
- Leisure: land attached to former sites of leisure, such as sports clubs, social clubs and allotments
- Open space: public open spaces
- Other: pockets of land with no known use

Affordable housing

Local Plan Policy H6: Affordable Housing

New residential schemes of 25 dwellings or more (excluding student accommodation), or more than 1 ha, will be expected to provide 25% of all dwellings as affordable homes.

3.34. A total of **190 affordable homes** were delivered in 2022/23, amounting to 11.4% of the overall delivery. This was up on the previous year's delivery of around 5% and brings the cumulative total during the Plan period to 2,752 (**Figure 9**).

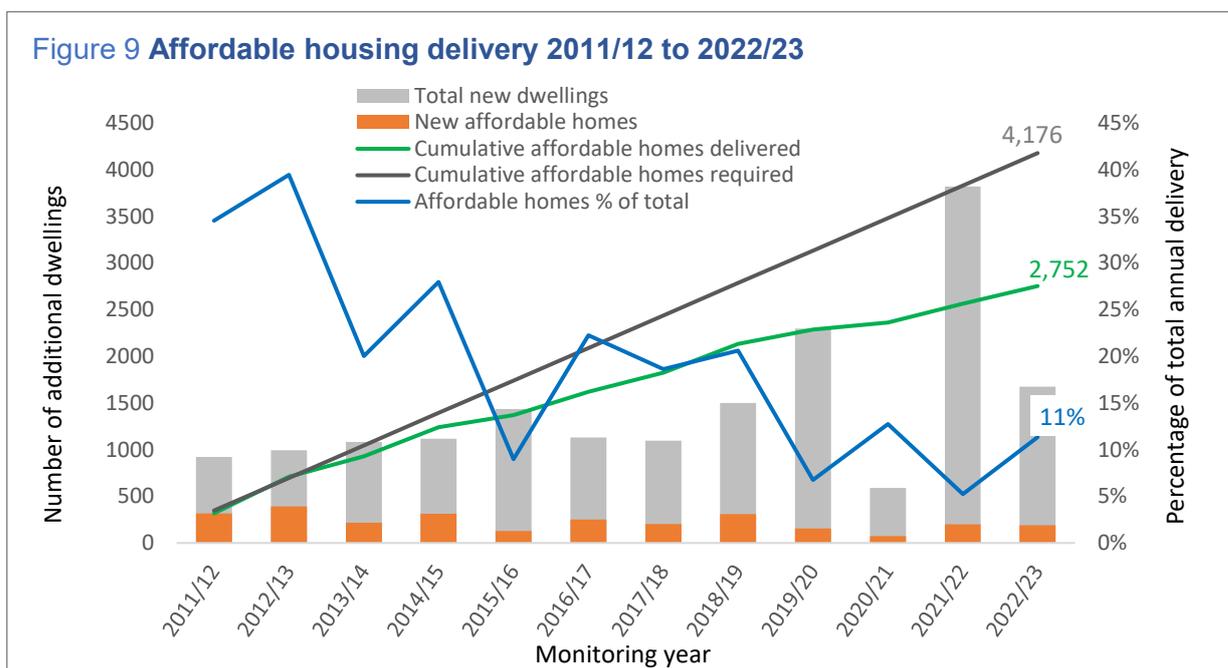

Figure 9 The number of affordable homes built as a percentage of total additional homes during the Local Plan period. The plot for percentage figures is shown against a second vertical axis.

Data available in **Appendix 3**.

3.35. The majority of affordable homes were 3-bed houses (34.2%). There was a fairly even proportion of 1-bed, 2-bed and 3-bed properties of all types, with a small number of 4-bed houses delivered (**Table 5**).

Table 5 Affordable housing mix delivery 2022/23

Type	Number of bedrooms				Total	% of total
	1	2	3	4+		
House	0	53	65	6	124	65.3%
Bungalow	3	2	0	0	5	2.6%
Flat	52	9	0	0	61	32.1%
Total	55	64	65	6	190	
% of total	28.9%	33.7%	34.2%	3.1%		

Data available in **Appendix 3**.

3.36. Not all sites are required to deliver affordable housing. Of the total 1,674 homes delivered in 2022/23, 548 were on sites that met the threshold requiring provision of affordable housing.¹³ **Delivery of 175 affordable homes on these sites equated to 32.0%.**

3.37. The Local Plan established a total requirement for 6,960 new affordable homes, or around 348 per year. While the current cumulative delivery is lower than planned, several large sites including SUEs at Keresley and Eastern Green are either under construction or expected to begin full construction in 2023/24.

Delivery of affordable housing at these sites is expected to be relatively high over the remainder of the Local Plan period.

Table 6 Affordable Housing delivery 2022/23

Type	All housing	Affordable Housing	% Affordable Housing
All sites	1,674	190	11%
Sites meeting AH threshold	548	175	32%

Affordable housing ('AH') requirement threshold is set by Policy H6.

3.38. Occasionally, a developer may be unable to deliver the required number of affordable homes on a site. This may be due to a lack of interest from registered housing providers in taking on the homes, or it may be due to site viability issues. If robust evidence is provided in such circumstances, the Council may make an agreement with the developer under section 106 of the Town and Country Planning Act 1990 for a financial contribution to be made by the developer in lieu of affordable homes on site. The Council can then spend the money towards the provision of affordable homes elsewhere in the city.

3.39. In 2022/23, the Council received section 106 contributions totalling **£670,711.23** to be spent on increasing the provision of affordable homes in Coventry (relating to planning applications OUT/2014/2538 and FUL/2018/2717).

¹³ Local Plan Policy H6 requires that planning applications for 25 or more dwellings or 1 ha or more in area should provide at least 25% affordable housing in various mixes depending on the type of site. This requirement excludes PBSA sites.

Housing Delivery Test

3.40. The *Housing Delivery Test* ('HDT') is a calculation set by the Government to measure housing delivery performance against requirements over a rolling three-year period. A percentage score is calculated using the following formula:

$$\frac{\text{Net homes delivered over previous 3 year period}}{\text{Total number of homes required over 3 year period}}$$

3.41. For the current 3-year period 2020/21 to 2022/23, Coventry exceeded its requirement with an HDT score of 149%.

Table 7 Data used in Housing Delivery Test calculation 2022/23

Monitoring period	Housing requirement	COVID-19 adjustment	COVID-19 adjusted housing requirement	Net homes delivered
2020/21	1,300	-67%	871	589
2021/22	1,300	-	1,300	3,818
2022/23	1,911	-	1,911	1,675
	4,511	-	4,082	6,082
The requirement for 2020/21 is adjusted for COVID-19 in line with Government directive.				

3.42. With the Local Plan becoming more than 5 years old (since adoption) on 6th December 2022, the previously established housing requirement is now considered out of date. Until a new housing requirement is agreed with the Planning Inspectorate, it must be replaced by the *minimum annual local housing need*. The HDT measurement rulebook¹⁴ states:

'14. Where the latest adopted housing requirement figure is over 5 years old, unless the strategic policies have been reviewed and found not to require updating, the figure used will be:

¹⁴ The Housing Delivery Test measurement rule book is available at: <https://www.gov.uk/government/publications/housing-delivery-test-measurement-rule-book>

i. For areas with a local plan or a joint local plan: the minimum annual local housing need figure

20. Where a housing requirement figure becomes older than 5 years (unless the relevant strategic policies have been reviewed and found not to require updating) during the Housing Delivery Test period, this will be used for the Housing Delivery Test measurement up to the 5th anniversary of its adoption. Where this anniversary is part way through the year, the housing requirement will be apportioned based on the number of days in the year.’

3.43. Using the *standard method*¹⁵, the *minimum annual local housing need* for Coventry is **3,209 dwellings per year**:

- Step 1: Mean projected growth per year 2022-2032 = 2,104
- Step 2: Adjustment to take account of affordability
 - Affordability ratio 2021 (previous calendar year) = 6.08
 - Adjusted need per year = **2,377**
- Step 3: Cap = not applicable
- Step 4: Cities and urban centres 35% uplift applied = **3,209**

Table 8 HDT apportioned housing requirement 2022/23

Monitoring period	Full-year housing requirement	No. of days applied (inclusive)	Portion	Apportioned housing requirement 2022/23
01 Apr 22 to 05 Dec 22	1,300	249	68%	884
06 Dec 22 to 31 Mar 23	3,209	116	32%	1,027
		365	100%	1,911

The number of days applied is pro-rata based on the date at which the Local Plan became more than 5 years old (6th December 2022).

3.44. When reporting communal accommodation, the HDT uses two ratios to convert a net increase in bedrooms to an equivalent number of dwellings:

- Student communal accommodation: 2.5 bedrooms = 1 dwelling
- Other communal accommodation: 1.8 bedrooms = 1 dwelling

For example, a student development of 100 bedrooms that each share a communal kitchen would represent 40 dwellings in the general housing stock, whereas a care

¹⁵ Further information on the *standard method* is available at: <https://www.gov.uk/guidance/housing-and-economic-development-needs-assessments> (Accessed 09 October 2023).

home with 100 bedrooms each sharing a communal kitchen would be counted as 56 dwellings (rounded).

Local Plan housing trajectory

3.45. The Local Plan requires the Coventry to deliver a total of 24,600 additional homes from 2011/12 to 2031/32 (currently subject to review). **Table 9** shows the cumulative delivery to 2022/23 and a forecast of future supply, giving a total forecast of 28,591 additional homes across the Plan period.

Table 9 Local Plan housing performance 2011/12 to 22/23 and supply trajectory 31st March 2023

	Trajectory years		Total
	1-5 (23/24 to 27/28)	6-9 (28/29 to 31/32)	
Cumulative completions 2011/12-2022/23			17,689
Detailed planning permissions (extant)	5,610	134	5,744
<i>Local Plan</i>	1,706	134	1,840
<i>SHLAA</i>	754	0	754
<i>CCAAP</i>	1,662	0	1,662
<i>Windfall</i>	1,488	0	1,488
Outline permissions (extant but awaiting reserved matters approval)	1,121	1,532	2,653
<i>Local Plan</i>	875	875	1,750
<i>SHLAA</i>	31	0	31
<i>CCAAP</i>	200	400	600
<i>Windfall</i>	15	257	272
Forecast future supply	400	2,105	2,505
<i>CCAAP remaining allocations</i>	0	200	200
<i>Windfall</i> ^	400	800	1,200
<i>Local Plan remaining allocations</i>	0	865	865
<i>Brownfield</i> ^^	0	240	240
	7,131	3,771	28,591

PBSA and communal accommodation may be included in extant permissions as a dwelling equivalent figure in line with the Housing Delivery Test.
^ Windfall future supply is based on the HELAA 2023 figure of 200 dwellings per year from year 4 onwards (years 1-3 are considered accounted for by existing planning permissions).
^^ Brownfield future supply is pro-rata based on the HELAA 2023 figure of 1,200 dwellings over a 20 year period.
Data available in **Appendix 5**.

- 3.46. Completion rates are projected for sites with extant planning permission and sites that do not have planning permission but which are allocated in the Local Plan or HELAA and are expected to come forward. Additionally, it is likely that smaller windfall sites will continue to come forward.
- 3.47. At 31st March 2023, detailed planning permissions provided an unbuilt potential of 5,744 additional dwellings (**Table 9**). Of these, 3,041 were on sites already under construction. A further 6,123 dwellings had outline consent with reserved matters either pending approval or not yet received.
- 3.48. It should be noted that a site is classed as under construction as soon as early foundation works or other material development has commenced and build rates may vary considerably.

5-Year Housing Land Supply

- 3.49. The Government requires planning authorities to show that they hold enough housing supply for the next five years by comparing their delivery forecasts against their requirements. With the anniversary of the adoption of Coventry's current Local Plan being more than 5 years ago, the previously established housing requirement is out of date and the *standard method calculation* must be used to calculate the *annual minimum requirement* for Coventry (see **Housing Delivery Test** section).
- 3.50. The calculation in **Table 10** shows that at 31st March 2023, Coventry held 2.12 years of housing land supply.

Table 10 5-Year housing land supply calculation at 31st March 2023

	Number of dwellings	5-Year Housing Land Supply
5-year housing delivery forecast	7,131	--
Annual minimum requirement		
Without 5% buffer	3,209	2.22
With 5% buffer	3,369	2.12

- 3.51. Raw data is available in **Appendix 5** and a detailed 5-year housing land supply report showing the methodology used is available in **Appendix 6**.

Employment

Local Plan Policy DS1

- 1b. A minimum of 128 ha of employment land within the city's administrative boundary, including:
- i. at least 176,000 sqm of office floor space at Friargate and the wider city centre,
 - ii. the continued expansion of Whitley Business Park; and
 - iii. 15ha strategic allocation adjoining the A45 as part of the Eastern Green sustainable urban extension

Local Plan Policy JE2

A minimum supply of new employment land on a 5 year rolling cycle of 58ha is required to be available at all times in Coventry and on sites outside but adjacent to the city's administrative boundary (the "Minimum Reservoir"). This will be achieved by using a combination of newly allocated and recycled land.

- 3.52. In the context of this AMR and the Local Plan, 'employment land' refers to commercial development designated with the following Use Classes:
- **B1** Business
 - **B2** General industrial
 - **B8** Storage or distribution
- 3.53. However, on 1st September 2020, a new **E Use Class** was introduced that effectively replaced the now-revoked class B1.
- 3.54. Use Class E is intended to provide greater flexibility and simplicity in the planning system by allowing commercial premises to move between a broader range of sub-classes without the need to seek planning permission. For example, an office building formerly classed as B1(a) would now be classed as E(g), allowing it to change use to E(a) (retail) without planning permission.
- 3.55. Consequently, monitoring Use Class E has become very challenging. To be as informative as possible, only developments falling within Use Classes B2, B8 or mixed (E(g)/B2/B8) are now reported as employment land. As office buildings usually have relatively small footprints, so the omission of such developments has only a marginal impact on the delivery of employment land. Many B2 and B8 developments include comparatively small ancillary office spaces, which may be included in the figures for B2 or B8 employment land.

3.56. The principal measurement stated in the Local Plan is for the delivery of 128 hectares of new employment land across the plan period. Measurements in hectares represent the entirety of a site including its curtilage. Where possible, internal floorspace is also presented in square metres. So, for example, a single storey building would have a floorspace smaller than its site area, whereas a multi-storey building is likely to have floorspace exceeding its site area.

Employment land delivery

3.57. The monitoring year 2022/23 saw gross delivery of **8.5 ha of B2/B8 employment land** in Coventry. A small loss of 0.20 ha produced a **net delivery to 8.3 ha** (*Table 11*).

3.58. Sites currently under construction are expected to deliver 2.57 ha (net) of B2/B8 employment land next year.

3.59. The general shift in planning applications is towards mixed schemes providing both B2 and B8 facilities along with ancillary office space.

3.60. Cumulative delivery of employment land across the Local Plan period to 2022/23 was

94.4 ha, 34% above the requirement of 70.4 ha at this point in the trajectory (*Figure 10*). Some historical data have been adjusted from figures published prior to 2021/22 following a review of employment land that found some errors in past reporting, largely relating to sites outside of Coventry’s administrative boundary that were attributed to Coventry in error. This led to the cumulative employment land delivery figure for 2020/21 being revised down from 156.50 ha to 85.76 ha.

Table 11 Employment gains 2022/23 by Use Class

<i>(All figures in hectares)</i>			
Use Class	Gains	Losses	Net gain
B2	0.1	0.0	0.1
B8	0.0	-0.2	-0.2
Mixed B2/B8	8.4	0.0	8.4
	8.5	-0.2	8.3

'Mixed' is predominantly Use Classes B2 and B8 but may include some ancillary office space.
Data available in **Appendix 7**.

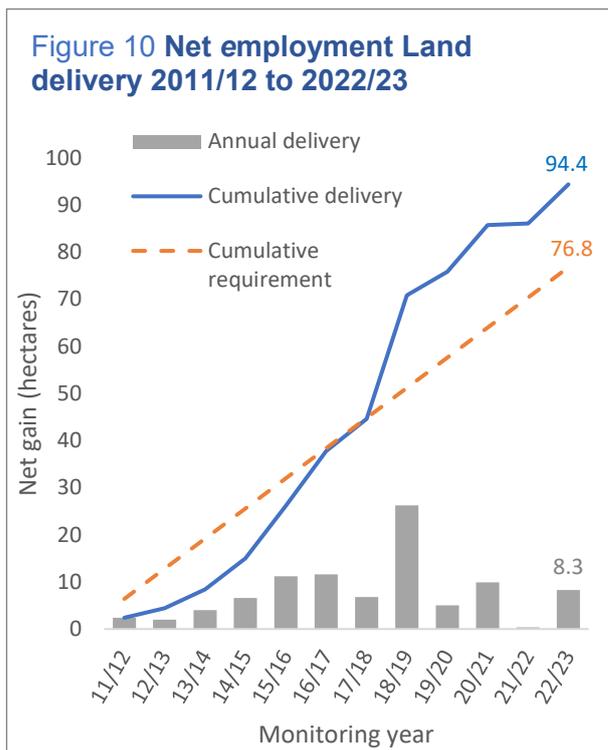

Figure 10 Use Classes B1/E(g) are excluded from figures since 2021/22. See **Appendix 7**.

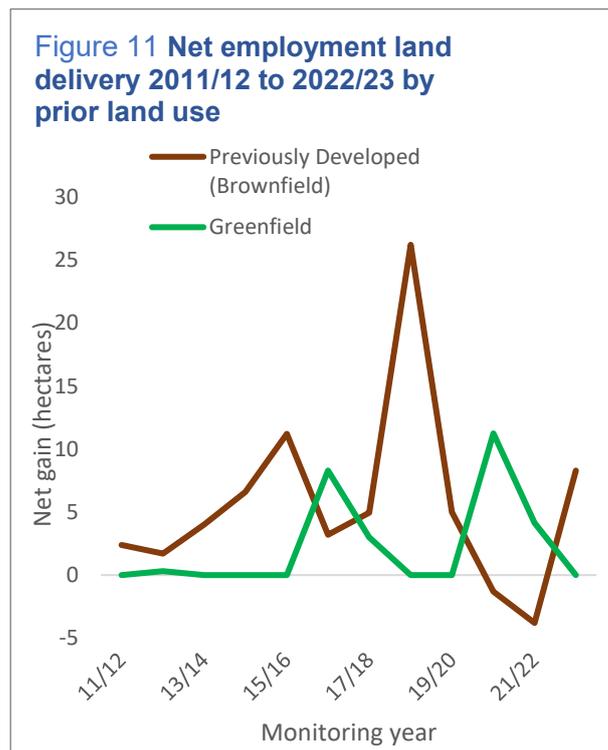

Figure 11 A small number of green belt developments may be included in the figure for greenfield. See **Appendix 7**.

- 3.61. All additional employment land in 2022/23 was delivered on previously developed land (brownfield sites). One notable development excluded from the data was a materials recycling facility (Use Class Sui Generis) constructed on around 10.5 hectares of greenfield land off London Road (planning application FMES/2020/0427).
- 3.62. Although Use Class E and the now-revoked class B1 have been discounted from employment land figures, Use Class E(g) is an important indicator for office trends and is included in floorspace completions in **Figure 12**.

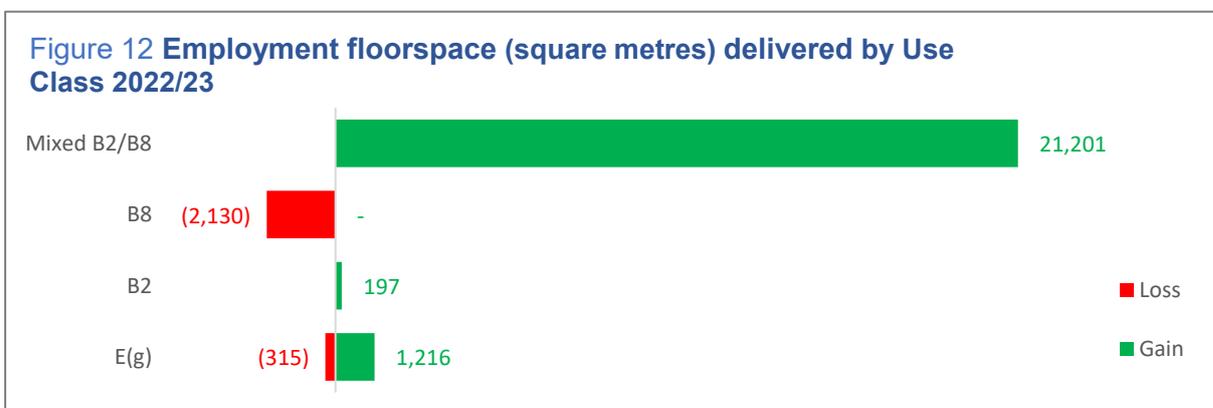

Figure 12 Data available in **Appendix 7**.

3.63. Around 20,000 square metres of prime office space is currently under construction at Two Friargate (planning application RMM/2016/0870), near Coventry Railway station, and is expected to complete in 2023/24.

Employment allocations

3.64. The Local Plan identified eight sites to provide up to 107 hectares of employment land between 2011/12 and 2031/32. To 31st March 2023, delivery on these sites totalled 47.98 hectares (**Table 12**).

Table 12 Completions on allocated employment sites 2011/12 to 2022/23

<i>(All figures in hectares)</i>						
Ref.	Site name	Allocated	Completions			Remaining
			22/23	Previous	Cumulative	
JE2:1	Friargate	7.00	0.00	0.20	0.20	6.52
JE2:2	Lyons Park	19.00	0.00	22.06	22.06	0.00
JE2:3	Whitley Business Park	30.00	0.00	23.54	23.54	6.46
JE2:4	Land at Baginton Fields and South East of Whitley Business Park	25.00	0.00	0.00	0.00	25.00
JE2:5	Eastern Green	15.00	0.00	0.00	0.00	15.00
JE2:6	Whitmore Park	8.00	2.18	0.00	2.18	5.82
JE2:7	Durbar Avenue	1.50	0.00	0.00	0.00	1.50
JE2:8	Land at Aldermans Green Road & Sutton Stop	1.50	0.00	0.00	0.00	1.50
		107.00	2.18	45.80	47.98	61.80
<p>Corrections: total cumulative completions were stated in the 2021/22 AMR as 33.80 ha. However, this figure omitted prior completions at Whitley Business Park (JE2:3) in error. This has been adjusted here to show current cumulative completions of 23.54 ha.</p> <p>The 2023 HELAA shows a remaining allocation of 2.5 ha at JE2:6 (Whitmore Park), but recent amendments to the site area and completion dates of a phased delivery leave a revised remaining allocation of 5.82 ha.</p>						

3.65. As well as employment land in Coventry, the Local Plan established an additional sub-regional need that increased the overall requirement to 215 ha across the plan period.

These sites are being delivered by surrounding local authorities as part of a *Memorandum of Understanding* with other local authorities.¹⁶

Future employment land supply

3.66. The Local Plan requires a minimum supply of 58 ha of new employment land on a 5-year rolling cycle to be available at all times in Coventry and on sites outside but adjacent to the city’s administrative boundary (the ‘Minimum Reservoir’).

3.67. At 31st March 2023, Coventry had a recognised supply of 62.48 hectares of employment land within the city boundary, either through extant planning permissions not yet completed, or through allocated land awaiting planning applications (**Table 13**).

Table 13 Employment land supply at 31st March 2023

	Hectares
Extant planning permissions	3.36
<i>Local Plan allocation</i>	0.00
<i>CCAAP</i>	0.00
<i>SHLAA</i>	-0.49
<i>Windfall</i>	1.01
Remaining allocated land	61.80
	62.48
Extant planning permissions for Use Classes B2 and B8 on sites both not started and under construction.

Appendix 6: Five Year Housing Land Supply methodology

Five Year Housing Land Supply 2023-2028

Introduction

- 1.1. This document sets out the supply of specific deliverable sites¹⁷ that will provide 5 years' worth of housing in accordance with paragraph 74 of the National Planning Policy Framework (NPPF), which states:

“Local planning authorities should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than five years old”.

- 1.2. All references are to developments within Coventry City Council's administrative area and the five-year period for establishing the 5 year housing land supply through this assessment is 1st April 2023 – 31st March 2028.
- 1.3. Planning Practice Guidance paragraph 029 Reference ID 68-029-29190722 states that for the purposes of calculating 5 year housing land supply, housing completions include: new build dwellings, conversions, change of use and demolitions and redevelopment.
- 1.4. The words 'housing', 'homes' and 'dwellings' in this report may at times be used to mean any type of residential dwellinghouse as defined under Use Class C3 of the Town and Country Planning (Use Classes) Order 1987.
- 1.5. Residential uses falling outside of Use Class C3 also contribute to Local Planning Authorities Housing Land Supply. These include Purpose Built Student Accommodation and other communal accommodation such as co-living (Sui Generis) and accommodation for older people, including residential institutions in Use Class C2. This contribution is based on the amount of accommodation released in the housing marking.

¹⁷ Defined in NPPF Annex 2:
https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/1182995/NPPF_Sept_23.pdf

1.6. When reporting communal accommodation, the Housing Delivery Test (HDT), which assesses a local planning authority's performance of housing delivery against its housing requirement over a rolling three-year period, uses two ratios to convert a net increase in bedrooms to an equivalent number of dwellings:

- Student communal accommodation: 2.5 bedrooms = 1 dwelling
- Other communal accommodation: 1.8 bedrooms = 1 dwelling

1.7. For example, a student development of 100 bedrooms that each share a communal kitchen would represent 40 dwellings in the general housing stock, whereas a care home with 100 bedrooms each sharing a communal kitchen would be counted as 56 dwellings (rounded).

Establishing a 5 Year Housing Land Requirement

Local Housing Need using the Standard Method

- 1.8. Planning Practice Guidance sets out the housing requirement figures Local Authorities should use when calculating their 5 year housing land supply. This is determined based on when strategic housing policies have been adopted or updated. Paragraph: 005 Reference ID: 68-005-20190722 of planning practice guidance sets out that:
 - i. Where the strategic plan was adopted in the last five years (or where the strategic housing policies have been reviewed within the last five years and found not to need updating) the housing requirement figures set out in the adopted strategic plan should be used.
 - ii. Where the strategic plan is more than five years old and no review has taken place, the 5 year housing land supply will be measured against the area's local housing need calculated using the standard method.
- 1.9. The Coventry Local Plan was adopted in December 2017 and is therefore more than five years old. This means the local housing need figure must be applied and determined using the Government's standard methodology when calculating the 5 year housing land supply.
- 1.10. Housing need is an unconstrained assessment of the number of homes needed in an area and the NPPF expects strategic policy-making authorities to follow the standard method for assessing housing need. The standard method to calculate housing need was adopted by the Government in 2018 and revised in 2020. It uses a formula to identify the minimum number of homes expected to be planned for, in a way which addresses projected household growth and historic under-supply. It identifies a minimum annual housing need figure. It does not produce a housing requirement figure. The 2020 revision applied a 35% uplift to the 20 largest cities and urban areas, including Coventry, to reflect the Government's agenda to drive housing into existing urban areas and encourage brownfield development.
- 1.11. The standard method involves a four-step process:

- Step 1: sets the baseline by calculating the annual average increase in households for the next 10 years using the 2014 ONS national household projections.
- Step 2: applies an uplift to this annual average growth, based on nationally published affordability ratios. Where an adjustment is to be made, the following formula is to be used. The baseline annual householder growth identified in step 1 is then multiplied by the resulting adjustment factor.

$$\text{Adjustment factor} = \left(\frac{\text{Local affordability ratio} - 4}{4} \right) \times 0.25 + 1$$

- Step 3: if necessary, the third step applies a cap to the extent of any uplift above the annual need in step 1. The cap limits the increases an individual local authority can face. How this is calculated depends on the current status of relevant strategic policies for housing. As the Council's current strategic policies are over 5 years old and given the level of annual household growth in Step 1, the Council has concluded these would not cap the housing need set out in Step 2. Therefore, the Council's need remains the same as at Step 2
- Step 4: applies the cities and urban centre 35% uplift. If a cap as at Step 3 was applied, the 35% uplift would be applied after the cap.

1.12. Using the standard method¹⁸, the minimum annual local housing need for Coventry is **3,209 dwellings per year**:

- Step 1: Mean projected growth per year 2022-2032 = 2,104
- Step 2: Adjustment to take account of affordability
 - Affordability ratio 2021 (previous calendar year) = 6.08
 - Adjusted need per year = 2,377
- Step 3: Cap = not applicable
- Step 4: Cities and urban centres 35% uplift applied = **3,209**

1.13. To demonstrate a 5-year housing land supply the Council will use the latest available evidence in the Housing and Economic Land Availability Assessment (HELAA), the Authority Monitoring Report (AMR) and the most up to date

¹⁸ Further information on the *standard method* is available at: <https://www.gov.uk/guidance/housing-and-economic-development-needs-assessments> (Accessed 09 October 2023).

monitoring data. These documents will form the basis in determining sites that have a realistic prospect of housing being delivered on them within 5 years.

What is a deliverable site?

- 1.14. Annex 2 of the NPPF states that to be considered deliverable, sites for housing should be:
- **available now,**
 - **offer a suitable location for development now, and**
 - **be achievable with a realistic prospect that housing will be delivered on the site within 5 years.**
- 1.15. These could be sites that are deliverable in principle and those which would require further evidence to be considered deliverable. This can include:
- a. **sites which do not involve major development and have planning permission, and all sites with detailed planning permission should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within 5 years** (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).
- b. where further evidence is required, this can include the following sites, which should only be considered deliverable where there is clear evidence that housing completions will begin on site within 5 years, namely sites which:
- **have outline planning permission for major development;**
 - **are allocated in a development plan;**
 - **have a grant of permission in principle; or**
 - **are identified on a brownfield register.**

Deciding the appropriate buffer through the Housing Delivery Test

- 1.16. Paragraph 74 of the NPPF goes onto say that an additional buffer of either 5%, 10% or 20% (moved forward from later in the plan period) should be added to the supply of specific deliverable sites as follows:
- a. 5% - (the minimum buffer for all authorities) to ensure choice and competition in the market for land; or
 - b. 10% - where the local planning authority wishes to demonstrate a 5 year supply of deliverable sites through an annual position statement or recently adopted plan, to account for any fluctuations in the market during that year; or
 - c. 20% - for authorities where there has been significant under delivery of housing (where it has fallen below 85% of the requirement as set out in the last published Housing Delivery Test results) over the previous three years, to improve the prospect of achieving the planned supply.

- 1.17. The Housing Delivery Test (HDT), introduced in 2018, is a calculation set by the Government to assess a local planning authority's performance of housing delivery against its housing requirement over a rolling three-year period. It is a percentage measurement of the number of net homes delivered against the number of homes required. The calculation uses the following:

$$\frac{\text{Net homes delivered over previous 3 year period}}{\text{Total number of homes required over 3 year period}}$$

- 1.18. Paragraph 76 of the NPPF states:

“To maintain the supply of housing, local planning authorities should monitor progress in building out sites which have permission. Where the Housing Delivery Test indicates that delivery has fallen below 95% of the local planning authority's housing requirement over the previous three years, the authority should prepare an action plan in line with national planning guidance, to assess the causes of underdelivery and identify actions to increase delivery in future years.”

- 1.19. The data used in the HDT calculation is set out in the Council's AMR 2022/23. For the current period 2020/2021 to 2022/23, Coventry has an HDT score of 149%. This means the minimum requirement has been exceeded and is above the 95%

threshold, which means an action plan is not required. As there is no evidence of significant under delivery over the previous three years, a buffer of 5% will be added in Coventry in line with paragraph 74 of the NPPF for the purposes of calculating 5 year housing land supply.

Current Housing Land Requirement

- 1.20. The Standard Method gives Coventry a local housing requirement of 3,209 dwellings per annum for the purposes of calculating the 5 year housing land supply. When adding the 5% buffer required by paragraph 74 of the NPPF this would equate to a housing requirement of 3,369 dwellings per annum (16,845 over the five-year period – 2023-2028). Please see Table 1 below.
- 1.21. An average of 1,488 net dwellings have been completed each year since 2011/12 (the current adopted local plan base date) and the cumulative Coventry Local Plan requirement since 2011 has been exceeded.
- 1.22. By virtue of the Council exceeding the minimum Housing Delivery Test (HDT) calculation requirement for delivery targets, the 5% buffer is applicable for Coventry.

Table 1: The 5 Year Requirement 2022/23-2027/28

Year	5 Year Period 2023-2028
2023/2024	3,209
2024/2025	3,209
2025/2026	3,209
2026/2027	3,209
2027/2028	3,209
Sub-total	16,045
Total plus 5% buffer	16,847

5 Year Housing Land Supply Position

- 1.23. The Council's previous housing delivery review (2021/2022) was carried out under a Local Plan that was within 5 years of its adoption. The Coventry Local Plan now, however, is more than five years old, being adopted in December 2017, and means the Council's 5 year housing land supply position is being applied against a housing need figure determined using the Government's standard methodology.
- 1.24. The review of sites is based on the Council's annual site monitoring with the base date being 31st March 2023. As per the 2021/2022 review, this 2022/2023 review uses completion rates projected for sites with extant planning permission, along with sites that do not have planning permission, but which are allocated in the Local Plan or HELAA and expected to come forward.
- 1.25. In addition to the Local Plan and the HELAA, the Authority Monitoring Report (AMR) provides the breakdown of the number of homes permitted under extant planning permissions (both detailed and outline) for future dwellings, but not yet built, at the end of the monitoring year – 31st March 2023. Communal living accommodation is included and converted to a dwelling equivalent figure in line with the Housing Delivery Test (HDT). The two ratios used in the HDT to convert a net increase in bedrooms to an equivalent number of dwellings are as follows:
- Student communal accommodation: 2.5 bedrooms = 1 dwelling
 - Other communal accommodation: 1.8 bedrooms = 1 dwelling

Sites with Extant Permissions – Implemented and non-implemented

- 1.26. The housing supply with permission is split between those sites not yet started and the remaining capacity on sites which are already under construction. Replacement dwellings to be lost from supply are also discounted in calculating the five year supply to ensure any figures are net increases.
- 1.27. For sites with detailed (full) planning permission, major and minor, the Council applies the presumption in the NPPF that states that *“sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years.*

The Council then estimates the amount of housing supply that will be delivered within the five years”, having regard to the number of units under construction on site and the likely lead-in times and build out rates established through the HELAA.

Outline permissions and site allocations

- 1.28. In addition to the assumption that sites with detailed planning permission, should be considered deliverable until permission expires, the NPPF also clarifies that sites with outline planning permission or which are allocated in the development plan, may be considered deliverable, but only when there is clear evidence that housing completions will be on site within five years.
- 1.29. As a result, the council has taken a conservative approach to estimating likely site delivery for sites with outline permission or housing allocation on it. These sites are only considered to be deliverable where there is specific and clear evidence to indicate the number of dwellings which will be realised on the site within the five year period. This means that sites that are not sufficiently progressed to meet this test are not currently included within the five-year supply on a precautionary basis. At the very least, detailed reserved matters application will need to have been submitted to the Council, and even then, taking into account the nature of the development, the inclusion of any dwellings to the five-year supply would only likely come in years 4 and 5. Given this cautious approach to assumed site delivery, the Council does not consider there is any further need to discount supply from outline permissions or allocated sites through a blanket non-implementation rate.

Supply from large C2 full planning permission

- 1.30. Planning Practice Guidance states that for the purposes of the five-year supply, local planning authorities will need to count housing provided for older people, including institutions in C2 use towards their supply. This is to be done using census data on the average number of adults living in households¹⁹. The census data referred to in the Planning Practice Guidance indicates that the average number of adults living in households in Coventry is 1.8 taken from a national position.

¹⁹Housing for older and disabled people, Paragraph: 016a Reference ID: 63-016a- 20190626, Revision date: 26 June 2019

- 1.31. Using the methodology provided for counting C2 older persons accommodation towards overall C3 supply in the Housing Delivery Test²⁰, implies that the following formula can be used for the purposes of the five-year supply:

Contribution towards five-year supply = number of C2 units / average number of adults living in a household (1.8)

- 1.32. There are currently 111 net C2 equivalent dwellings based on the above formula with either full or outline planning permission. 32 dwellings have outline approval with no reserved matters application submitted and these are therefore not included in the five-year supply. Therefore, 79 net C2 dwellings with full planning permission will go towards the Council's five-year supply.

Windfall sites

- 1.33. The NPPF (paragraph 71) permits a windfall allowance as part of anticipated supply, where there is compelling evidence that they will provide a reliable source of supply. Any allowance should be realistic having regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends.
- 1.34. There are currently 1,503 windfall sites contributing to the Council's five-year supply. They include sites with full permission that have commenced and those which have not commenced and those outline permissions which comply with the realistic delivery test set out above.
- 1.35. An analysis of windfall development was undertaken in the HELAA, which showed that there has been a constant delivery of windfall sites year on year. The AMR shows that there were on average 422 windfall completions per annum. Given this, it is considered reasonable and pragmatic to assume that a minimum of 200 dwellings each year will come from windfall sites. The allowance is only applied in years 4-5 to ensure there is no prospect of double counting with any existing planning permissions.
- 1.36. A windfall allowance of 400 dwellings has therefore been added to the 5 year supply, in accordance with the Council's windfall methodology in the HELAA

²⁰Housing Delivery Test: 2021 measurement technical note - GOV.UK (www.gov.uk)

taking the total windfall sites figure contributing to the five-year supply to 1,903 dwellings.

Summary

- 1.37. The City has a 2.12 year housing land supply. This is derived from a 5-year requirement of 16,847 dwellings (including a 5% buffer) (annual figures 3,209 x 1.05 = 3,369) and a supply of 7,131 dwellings.
- 1.38. Tables 3 and 4 below present the Council's final housing supply position for the period 1 April 2023 to 31 March 2028.

Table 3: Breakdown of the housing land supply position for 1st April 2023 - 31 March 2028

Status	Number of Dwellings
Under Construction	2,947
Detailed Planning permission not commenced	2,663
Outline planning permission	1,121
Windfall allowance	400
Total identified 5 year supply	7,131

*includes the 200 a year in years 4 and 5

Table 4: 5 year housing land supply against housing land requirement

Requirement (Local Housing Need)	Dwellings
Local Housing Need annual	3,209
Add 5% buffer to annual figure	3,369
Local Housing Need 2023-2028 (5 x 3,209 dwellings per annum)	16,045
Add 5% buffer	1,605
Total (5 years)	16,847
5 Year Supply	
Supply at 31 st March 2023	7,131
Calculation of 5YHLS	
5 year supply / annual housing need inc. 5% buffer	2.12 years
