

## Toolkit *for* Life For Primary Schools

“

“Primary schools can play a crucial role in helping their pupils to raise aspirations, broaden horizons, challenge stereotypes and develop the skills and sense of self to help reach their full potential.”

- The Careers & Enterprise Company.

”

This course is for learners aged 5 to 11 who are disengaged from the core curriculum and respond better to a practical way of learning. It also provides insights into career pathways which may inspire them to dream of what they want to be when they leave school.

Learners receive a certificate of participation recognising their achievement. Their Wellbeing is also monitored.

The course comprises 12 different one-day sessions available Monday – Friday. It's provided on a rolling carousel basis so learners can jump off and on throughout the year. It takes place at a central Coventry venue or may be provided on school premises if there are sufficient learners to make it cost-effective.

*It's highly inter-active and learner-centred with practical activities such as cooking, construction and gardening which develop:*

- *Greater self-awareness and resilience.*
- *Improved confidence and self-esteem.*
- *Increased emotional control and intelligence.*
- *Techniques to cope with challenging situations.*
