

Who we are

Chalkline was built as a response to a one-size fits all delivery of education that left many young people behind. We work with pupils across a wide range of ages and needs (SEND/SEMH) with support both academically and emotionally. We prioritise building positive working relationships and pupil voice throughout the learning we deliver and provide comprehensive records of each session that are quality assured.

Our Tutors all support on an outreach basis and support core subjects and CEIAG. If you need something bespoke, talk to us!

What we offer

Our Tutors adapt to the Pupil, every time! All Tutors are qualified, experienced and we build on that with ongoing support and an extensive CPD programme in order for them to support a wide range of needs - From trauma informed mentoring to confidence building in lifeskills and CEIAG, overcoming barriers to progression and coping with

Student Outcomes

Every journey is unique! We have worked with non-attenders that have achieved functional skills qualifications despite 5-years of non-attendance by engaging with them at home and in the local community, we have helped Pupils with high anxiety smash barriers and positively progress into further education or work and we consistently break negativity around education, making it relevant and fun for the young people we support.

We don't just close gaps in knowledge, we support while changing how young people think and feel about learning!
