Who we are

At Bridge Online School, we specialise in supporting students who find it challenging to thrive in conventional classrooms. As a trusted alternative education provider in the UK, we offer a flexible, online learning environment designed to meet the needs of students who may struggle with traditional school settings due to anxiety, special educational needs, or other personal circumstances. Our personalised approach ensures every child receives tailored support, allowing them to learn at their own pace, build confidence, and achieve their full potential in a safe and understanding space. Partnering with schools, we provide a seamless solution for students needing an alternative pathway, helping them stay engaged in their education while addressing their unique challenges.

What we offer

At Bridge Online School we are committed to providing children and young people with access to a range of recognised qualifications that will enhance their future prospects. Our program offers:

- Academic Qualifications:** We offer a range of Functional Skills awards and iGCSEs and academic qualifications in core subjects, such as English, mathematics, and science. We also offer qualifications in other subjects, depending on interest and demand. Our curriculum is aligned with national standards, and we provide high-quality teaching and resources to ensure that children and young people are well-prepared for examinations. We build an individual timetable of subjects that suits the needs of the learner.
- Flexible Vocational Options:** Via our partner schools within our group we can also offer a range of flexible learning options to meet the individual needs of young people. These options might include online learning, blended learning, and part-time courses. We work with each young person to develop a learning plan that is tailored to their individual circumstances. Qualifications offered include Level 2 and Level 3 Art and Design courses, where students work at their own pace and are supported by a dedicated subject tutor.
- Careers Guidance:** We work with careers advisors to provide information about different career paths, as well as support with applications for further education and employment.
- Exam Preparation and Support:** We provide comprehensive exam preparation and support to all children and young people on our courses, including practice exams, revision sessions, and study skills. Via our SENDCO we also provide support with exam anxiety and stress management.

Student Outcomes

We are experts in working with children who find school difficult, reducing barriers to learning and increasing confidence for the anxious learner. Students can take examinations if they wish from Entry Level qualifications right up to GCSE and Level 3 Awards.
