

Who we are

Fast Forward Vocational Training, in partnership with TeamSport Indoor Karting, offers a unique national accredited programme for young people to gain vocational skills and qualifications in mechanics.

Specialising in SEMH support, accredited by SYUK, Fast Forward is dedicated to bridging the gap for disadvantaged youth to help them succeed and build positive futures. Students learn in a live workshop environment, tackling real-world mechanical challenges, and enjoy access to the karting track as an engaging reward at the end of each session.

What we offer

Fast Forward aims to provide a safe, engaging and supportive learning environment that supports personal development, academic achievement and successful progression into future education and career pathways.

Student Outcomes

Students will improve their engagement, attendance and confidence through practical, hands-on vocational learning. They will develop industry-specific knowledge, employability skills, teamwork, communication and problem-solving abilities while working towards recognised qualifications. Learners will gain greater motivation, resilience and independence, supporting successful progression into further education, training, apprenticeships or employment. For some learners, the provision will also support successful reintegration into mainstream education through improved behaviour, attitudes to learning and personal development.
