Who we are

TLC LIVE delivers personalised online tutoring sessions led by fully qualified teachers. Our innovative platform ensures accessible, engaging learning experiences for children aged 6 to A-level, offering over 35,000 hours of National Curriculum content. By operating online, we recruit exceptional tutors based on expertise, not location, guaranteeing high-quality support. Our service focuses on improving academic engagement and achievement through tailored one-on-one support. Sessions target skills gaps identified in assessments, fostering confidence and academic growth. Outcomes include bridging educational barriers, helping students re-engage with learning, and achieving qualifications or reintegration into mainstream education. As a registered ASDAN and NCFE exam centre, we also provide alternative pathways. These include short courses, Level 1 and 2 qualifications, functional skills exams, and a mentoring programme, ensuring students have diverse opportunities to succeed. Measuring Progress We use robust tools to track outcomes, including:

- Baseline and progress assessments every 10 lessons.
- Monitoring behaviour and engagement improvements.
- Feedback forms completed by students and tutors after each session.
- End-of-intervention assessments to evaluate overall progress.

Attendance is carefully managed via reminders and follow-ups from our attendance team, with real-time tracking available through our portal. Our adaptive lessons address individual skill gaps, helping students catch up and excel. Our SMART assessments identify age-related learning levels, guiding targeted interventions to improve skills effectively. TLC LIVE is dedicated to supporting every student's unique learning journey.

What we offer

PSHE/Mentoring as well as AQA Unit scheme awards

Student Outcomes

TLC LIVE supports a wide range of learners, including those at risk of exclusion, with low attendance, or facing barriers to mainstream education. Our provision is often used to support reintegration, reduce disengagement, or offer continuity of education during placement transitions. We provide flexible support for pupils in care, those with EHCPs, and learners educated outside of mainstream settings. TLC LIVE's alternative provision is designed to be adaptive, inclusive, and outcome-focused—supporting academic achievement, improved attendance, increased engagement, and successful transitions into further education, training, or reintegration into mainstream settings. We are committed to supporting every student's unique learning journey with flexibility, compassion, and measurable impact.
