Nova Verta Vehicle Refinishing Combination Spray Booths are manufactured to meet Environmental Protection Act, Statutory Guidance for Re-spraying of Road Vehicles Process Guidance Note 6/34 (11)

Particulate Matter Emission

Guaranteed not to exceed 10mg/m³ providing maintenance schedule are adhered to (see manual).

Prevention of Fugitive Emissions

The booth has been adjusted to run on negative pressure within the cabin. A magnehelic pressure gauge and audible alarm system has been fitted.

Exhaust Duct

03 Metres above roof opening, not less than 08 Metres above ground level or as agreed with the local authorities.
The ducting opening has been installed in a vertical position.

Efflux Velocity

This has been designed to give a minimum of 15mt/sec at the exit point.

Notes

1. It is a requirement of the Secretary of State's Guidance Note that Spray Booth should be serviced every 12/14 months.
2. Compliance is given only from date of certification, continued certification is the responsibility of the Spray Booth owners.
3. This certificate is NOT TRANSFERABLE for any re-sighting of the Spray Booth/s listed.
